# ximera — Simultaneously write print and online interactive materials.\*

Jim Fowler Jeramiah Hocutt Oscar Levin Jason Nowell Wim Obbels Hans Parshall Bart Snapp

Released 2024/05/12

## Abstract

"Ximera begins where TEX ends." The ximera class aids in the creation of handouts, worksheets, exercises, and sections of textbooks to be used either individually or "glued" together via a xourse file. All ximera documents can be deployed in an online interactive form via xake See: Ximera Project and the source code on GitHub.

# 1 Introduction

Ximera, pronounced "chimera," (Ximera: Interactive, Mathematics, EResources, for All) is an open-source platform that provides tools for authoring and publishing (PDF and Online), open-source, interactive educational content, such as textbooks, assessments, and online courses. The Ximera document class provides the following features:

Formatting for different domains The Ximera document class provides built-in support for formatting documents in both PDF and online formats, which can be a big time-saver for authors. Additionally, it allows for the simultaneous creation of solution manuals and teaching editions, which can be especially useful for educators.

Compiling individually or as a whole With the Ximera document class, authors can easily compile individual documents or an entire collection of documents. This flexibility can be helpful when making changes to specific documents without having to re-compile the entire collection. Moreover, this allows an author to share large portions of a text with another, with minimal changes.

Interactive content The Ximera document class allows for the inclusion of interactive content, such as answer boxes that are validated by a client-side computer algebra system. Additionally, it allows for the embedding of YouTube videos, Desmos graphs, and GeoGebra interactives.

All content displayed By default, the Ximera document class displays all content to the author. This means the author see what the students see, along with answers and solutions, and links (that can be checked) to various interactive elements (when deployed, the interactive elements are truly embedded). This can be especially helpful for catching errors or inconsistencies in the content.

Online examples can be found at

https://go.osu.edu/ximera-examples

<sup>\*</sup>This file describes version v1.5.1, last revised 2024/05/12.

# 2 ximera.cls

# 2.1 Options for the class

We start by listing the options for the ximera document class. Note, since the xourse class is based on the ximera class, all listed options are available there too.

- 1 (\*classXimera)
- handout The default behavior of the class is to display all content. This means that if any questions are asked, all answers are shown. Moreover, some content will only have a meaningful presentation when displayed online. When compiled without any options, this content will be shown too. This option will supress such content and generate a reasonable printiable "handout."
  - 2 \newif\ifhandout
  - 3 \handoutfalse
  - 4 \DeclareOption{handout}{\handouttrue}
- noauthor By default, authors are listed at the bottom of the first page of a document. This option will supress the listing of the authors.
  - 5 \newif\ifnoauthor
  - $6 \setminus noauthorfalse$
  - 7 \DeclareOption{noauthor}{\noauthortrue}
- nooutcomes By default, learning outcomes are listed at the bottom of the first page of a document. This option will supress the listing of the learning outcomes.
  - 8 \newif\ifnooutcomes
  - 9 \nooutcomesfalse
  - 10 \DeclareOption{nooutcomes}{\nooutcomestrue}

instructornotes This option will turn on (and off) notes written for the instructor.

- 11 \newif\ifinstructornotes
- 12 \instructornotesfalse

noinstructornotes This option will turn off (and on) notes written for the instructor.

- hints When the handout options is used, hints are not shown. This option will make hints visible in handout mode.
  - 15 \newif\ifhints
  - 16 \hintsfalse
  - 17 \DeclareOption{hints}{\hintstrue}
- newpage This option will start each problem-like environment (exercise, question, problem, and exploration) start on a new page.
  - 18 \newif\ifnewpage
  - $19 \newpagefalse$
  - 20 \DeclareOption{newpage}{\newpagetrue}
- numbers This option will number the titles of the activity. By default the activities are unnumbered
  - 21 \newif\ifnumbers
  - $22 \setminus numbersfalse$
  - 23 \DeclareOption{numbers}{\numberstrue}
- wordchoicegiven This option will replace the choices shown by wordChoice with the correct choice. No indication of the wordChoice environment will be shown.
  - 24 \newif\ifwordchoicegiven
  - 25 \wordchoicegivenfalse
  - 26 \DeclareOption{wordchoicegiven}{\wordchoicegiventrue}
  - 27 \newif\iffirstinlinechoice% Support for other wordchoice command contents.
  - 28 \firstinlinechoicetrue

# 2.2 Loading packages

Since we want \cancel to work, we load it here to avoid polluting the .jax output.

```
63 \RequirePackage[makeroom]{cancel}
```

Quite a few packages are required by the document class. This is a list of required packages. As packages are added to this list, we should include a comment as to where they are being utilized. This will help keep this list from being redundant and/or outdated.

```
64 \RequirePackage[inline] {enumitem}
65 \RequirePackage[pagestyles] {titlesec}
66 \RequirePackage{titletoc}
67 \RequirePackage{titling}
68 \RequirePackage{url}
69 \RequirePackage[table] {xcolor}
70 \RequirePackage{tikz}
71 \RequirePackage{pgfplots}
72 \usepfplotslibrary{groupplots}
73 \usetikzlibrary{calc}
74 \RequirePackage{fancyvrb}
```

Load forloop for the problem environment dynamic naming and building.

```
75 \RequirePackage{forloop}
```

Now we load even more packages.

```
76 \RequirePackage{environ}% Included to allow saving of environment contents. This does *not* properties of the package and t
```

```
81 \RequirePackage{multido}% http://ctan.org/pkg/multido
 82 \RequirePackage{listings} %% is this required???
 84 \RequirePackage{xkeyval}
 86 \RequirePackage{comment}
 87 (/classXimera)
Various packages must be loaded early to avoid polluting the .jax file.
 88 (*classXimera)
 89 \RequirePackage{gettitlestring}
 90 \RequirePackage{nameref}
 91 \RequirePackage{epstopdf}
 92 (/classXimera)
2.3
      Page setup
We want non-indented spaced-out paragraphs.
 93 (*classXimera)
 94 \setlength{\parindent}{0pt}
 95 \setlength{\parskip}{5pt}
 96 (/classXimera)
To avoid weird margins in 2-sided mode, change the margins.
 97 (*classXimera)
 98 \oddsidemargin 62pt
 99 \evensidemargin 62pt
100 \textwidth 345pt
101 \headheight 14pt
102 (/classXimera)
On the HTML side, there is more complicated page setup to perform.

           2.4.6 Hints
hint (env.) Hint environments can be embedded inside problems.
           414 (*classXimera)
           Create a counter that will track how deeply nested the current hint is
           415 \newcounter{hintLevel}
           416 \setcounter{hintLevel}{0}
           Create an empty shell to renew
```

 $417 \newenvironment{hint}{}{}$ 

Now we renew the environment as needed, this should allow support for any transition code that treats some parts as a "handout" and some parts as non-handout. renewing the environment on the fly is a bit hacky.

```
418 \renewenvironment{hint}
419 {
420 \ifhandout
```

```
\setbox0\vbox\bgroup
                 422
                       \begin{trivlist}\item[\hskip \labelsep\small\slshape\bfseries Hint:\hspace{2ex}]
                 423

# **2.4.12** Foldable

The package mdframed is used to make pretty foldable, but the amsthm/mdframed conflict also messes up the .jax file so we don't load mdframed when performing the xake step. But even the below isn't enough to fix this.

637 %\iftikzexport\else\RequirePackage[framemethod=TikZ]{mdframed}\fi

```

# 2.6.2 TikZ export

 $2024\colon$  We DON NOT ANYMORE generate SVGs and PNGs for any TikZ images, via the "externalize" feature of TikZ.

Previously TikZ didn't compile natively into the website because of how the xake bake compilation works. In order to make Tikz work, you need to get the tool mutool on the machine that is performing xake bake.

On the HTML side, \answer emits spans—but it is usually just handled directly by
```

MathJax.

# 2.10.2 Multiple choice and the like

1159 \define@boolkey{choice}{correct}[true]{\def\choice@correct{#1}}

Use an ID to refer to the choice.

 $1160 \label{locality} $$1160 \end{multipleChoice} id $$ \ \end{multipleChoice} $$ id $$ \ \e$ 

**\otherchoice** outputs the item if correct and nothing if incorrect.

1161 \define@key{otherchoice}{value}[]{\def\otherchoice@value{#1}}

1162 \define@boolkey{otherchoice}{correct}[true]{\def\otherchoice@correct{#1}}

Default key choices for multiple choice options. Default for choice pairs. Default: answers without the option "correct=true" is "incorrect".

1163 \setkeys{choice}{correct=false,value=}

Defaults for multipleChoice pairs. Default to no id? – Jason

1164 \setkeys{multipleChoice}{id=}

Defaults for otherchoice pairs. Default "otherchoice" to behave like "choice" for error checking.

1165 \setkeys{otherchoice}{correct=false,value=} 1166  $\langle$  /classXimera $\rangle$ 

## **2.10.4** Choices

\choice Like \item but for choice environments. choice command denotes a possible answer choice for the multiple choice question.

# 2.12 Select all

1288 (/htXimera)

```
selectAll (env.) A multiple-multiple choice question

1289 (*classXimera)

1290 \newenvironment{selectAll}[1][]

1291 {\begin{trivlist}\item[\hskip \labelsep\small\bfseries Select All Correct Answers:]\hfil\beg.
1292 {\end{enumerate}\end{trivlist}}

1293 (/classXimera)
```

1286 \renewenvironment{multipleChoice@}{\refstepcounter{problem}}{}%

In the future we need this to (optionally) be displayed in the problem, while the actual code lives in the solution. Here is how this could be implemented: Like the title/maketitle commands, the multiple-choice could be stored in \themultiplechoice, flip a boolean, and execute \makemultiplechoice at the \end of the problem. We should also make a command called \showchoices that will show choices in the handout.

On the web, selectAll is handled just like multipleChoice.

### 2.12.1 Free response

```
freeResponse (env.) A freeform input box.
```

### 2.12.2 Feedback

feedback (env.) An initially hidden environment that uncovers itself at an appropriate time. New Validator rewrite code added by Jason Nowell. Original code orovided by Jim Fowler Validator is an environment designed to run a custom check on answers (usually) using javascript code

Define a placeholder command for validator and feedback.

```
1351 \langle *classXimera \rangle
1352 \langle *pH@Command \}
```

Validator should take an argument and detokenize it and display it at the start of the environment. The original Validator environment had everything framed in an mbox; presumably to make the text look a bit nicer, although this seems redundant with texttt. It shouldn't cause any harm so I have left it in for now.

```
1353 \newenvironment{validator}[1][]{
1354 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" 1355 \mbox{\texttt{\detokenize}expandafter{\PH@Command}}}% Now expand PH@Command once and then defined \{1356\}}
```

First, if it's a handout, we want feedback to eat everything and then disappear entirely. So we do this:

If this isn't a handout, then we want to display the Feedback by using a label, positioned and formated as a \item in a trivlist. It is important that we also detokenize the content of the optional argument, as it is likely to contain javascript or other code that latex won't be able to make sense of.

```
1365 \else
1366 \newenvironment{feedback}[1][attempt]{
1367
     \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter"
1368
1369
     \begin{trivlist}% Begin the trivlist to use formating of the "Feedback" label.
1370
     \item[\hskip \labelsep\small\slshape\bfseries Feedback% Format the "Feedback" label. Don't .
1371
     (\texttt{\detokenize\expandafter{\PH@Command}}):% Format (and detokenize) the condition for
1372
1373
     \hspace{2ex}]\small\slshape% Insert some space before the actual feedback given.
1374
1375
     \end{trivlist}
1376 }
1377
1378 \fi
_{1379}\;\langle/\mathsf{classXimera}\rangle
Feedback environments take an optional parameter (which describes when the feedback
is to be provided)

```

# 2.12.3 Ungraded activities

ungraded (env.) The ungraded environment is used to record that certain parts of activities should not be worth points. For example, if you want to use a multipleChoice as a survey question, you can place it inside an ungraded environment. On the LATEX side, the ungraded environment does nothing.

```
1390 (*classXimera)
1391 \newenvironment{ungraded}{}{}
1392 (/classXimera)
But on the html side, ungraded wraps the activities in a div in order to assign some
weight to them for grading.
1393 (*htXimera)
1394 \renewenvironment{ungraded}{%
1395 \ \texttt{\label{lignorePar} $$ \ \texttt{\label{lignoreIndent}$} \ \texttt{\label{lignoreIndent}$} $$
1397 \ifvmode \IgnorePar\fi \EndP\HCode{</div>}\IgnoreIndent%
```

1535 \LoadClass{ximera}

1536 % \begin{macrocode}

1537 \(/classXourse\)
```

# 3.1 Activities

The core of the xourse system. It works by redefining the document environment, thus making the \begin and \end{document} of the subfile 'transparent' to the inclusion. The redefinition of \documentclass is analogous, just having a required and an optional arguments which mean nothing to \subfile.

```
1538 \*classXourse\
1539 \newcommand{\skip@preamble}{%
1540 \let\document\relax\let\enddocument\relax%
1541 \newenvironment{document}{\let\input\otherinput}{}%
1542 \renewcommand{\documentclass}[2][subfiles]{}}
```

Note that the new command \subfile calls for \skip@preamble within a group. The changes to document and \documentclass are undone after the inclusion of the subfile.

Numbering starts a page too soon without this:

```
1543 \let\otherinput\input
```

Store usual \maketitle as \othermaketitle

1544 \let\othermaketitle\maketitle

\maketitle In a xourse file, \maketitle is redefined to give course packet title page and toc.

```
1545 \renewcommand{\maketitle}{ %
1546 \pagestyle{empty}
1547 \begin{center}
1548 ~\\ %puts space at top of page to move title down.
1549 \vskip .25\textheight
1550 \hrulefill\\
1551 \vskip 1em
1552 \bfseries{\Huge \Otitle} \\
1553 \hrulefill\\
1554 \vskip 3em
1555 {\Large \Oauthor}
1556 \vskip 2em
1557 {\large \Odate}
1558 \end{center}
1559 \clearpage
```

When **notoc** option is used, we do not include a table of contents. Otherwise we include a table of contents in every course packet.

```
1560 \ifnotoc
1561 \else
1562 \tableofcontents\clearpage
1563 \clearpage
1564 \fi
```

Switch to main pagestyle, just like a document with document class ximera.

```
1565 \pagestyle{main}
```

Renew maketitle to usual definition.

1566 \let\maketitle\othermaketitle

And we finish with our redefinition of \maketitle.

```
1567 }
1568 \relax
1569 \/classXourse
```

# 3.1.1 Regular activities

\activity Documents included with \activity will be included in the body of the xourse document. Any \input commands within included ximera documents will be ignored. Any \usepackage commands within included ximera documents will cause an error. Overlapping \newcommand definitions within multiple ximera documents included simultaneously will cause an error. The \activity command inputs the file name provided without \documentclass, without \begin{document}/\end{document} and without any inputs in the preamble of the included file.

```

The practice environment does nothing, but will eventually produce exercises at the

# 3.3 Grading by points

graded (env.) The graded environment does nothing in latex, but in html, it wraps the activities in a div in order to assign some weight to them for grading.

```
1653 \*classXourse\\
1654 \newenvironment{graded}[1]{}{\}
1655 \( / classXourse \)
So indeed this environment in html wraps the activities in a div in order to assign some number of points to them.

1656 \( *\text{htXourse} \)
1657 \( \text{renewenvironment} \) \( \text{graded} \) \[ 1]{\} \\
1658 \( \text{ifvmode \lignorePar\fi \EndP\\HCode\{\div\}\\ \lignoreIndent\} \)
1659 \\ \\
1660 \( \text{ifvmode \lignorePar\fi \EndP\\HCode\{\div\}\\ \lignoreIndent\} \)
1661 \\ \\
1662 \( \langle \text{htXourse} \)
```

# 3.4 Logos

\logo A logo for the xourse.

```
1663 (*classXourse)
1664 \newcommand*{\logo}[1]{%
      \ifx\@onlypreamble\@notprerr
1666
         \ClassError{xourse}{logo can only be used in the preamble}
1667
           {Move your logo command to the preamble}
1668
      \else %
        \IfFileExists{#1}%
1669
           {\gdef\xourse@logo{\#1}}{\%}
1670
           {\ClassError{xourse}{logo file does not exist}
1671
1672
             {To use logo, make sure that the referenced image file exists}}%
1673
      \fi%
1674 }
1676 \langle \text{/classXourse} \rangle
   The xourse logo is an og:image in the opengraph taxonomy.
