ximera — Simultaneously write print and online interactive materials.*

Jim Fowler Jeramiah Hocutt Oscar Levin Jason Nowell Hans Parshall Bart Snapp

Released 2018/10/28

Abstract

"Ximera begins where TFX ends." The ximera class aids in the creation of handouts, worksheets, exercises, and sections of textbooks to be used either individually or "glued" together via a xourse file. All ximera documents can be deployed in an online interactive form via xake See: Ximera Project and the source code on GitHub.

Introduction 1

2 ximera.cls

Options for the class

We start by listing the options for the ximera document class. Note, since the xourse class is based on the ximera class, all listed options are available there too.

1 (*classXimera)

The default behavior of the class is to display all content. This means that if any questions are asked, all answers are shown. Moreover, some content will only have a meaningful presentation when displayed online. When compiled without any options, this content will be shown too. This option will supress such content and generate a reasonable printiable "handout."

- 2 \newif\ifhandout
- 3 \handoutfalse
- 4 \DeclareOption{handout}{\handouttrue}

By default, authors are listed at the bottom of the first page of a document. This option will supress the listing of the authors.

- 5 \newif\ifnoauthor
- 6 \noauthorfalse
- 7 \DeclareOption{noauthor}{\noauthortrue}

By default, learning outcomes are listed at the bottom of the first page of a document. nooutcomes This option will supress the listing of the learning outcomes.

- 8 \newif\ifnooutcomes
- 9 \nooutcomesfalse
- 10 \DeclareOption{nooutcomes}{\nooutcomestrue}

instructornotes This option will turn on (and off) notes written for the instructor.

- 11 \newif\ifinstructornotes
- 12 \instructornotesfalse
- 13 \DeclareOption{instructornotes}{\instructornotestrue}

^{*}This file describes version v1.0, last revised 2018/10/28.

noinstructornotes This option will turn off (and on) notes written for the instructor.

14 \DeclareOption{noinstructornotes}{\instructornotestrue}

hints When the handout options is used, hints are not shown. This option will make hints visible in handout mode.

- 15 \newif\ifhints
- 16 \hintsfalse
- 17 \DeclareOption{hints}{\hintstrue}

newpage This option will start each problem-like environment (exercise, question, problem, and exploration) start on a new page.

- 18 \newif\ifnewpage
- 19 \newpagefalse
- 20 \DeclareOption{newpage}{\newpagetrue}

numbers This option will number the titles of the activity. By default the activities are unnumbered.

- 21 \newif\ifnumbers
- 22 \numbersfalse
- 23 \DeclareOption{numbers}{\numberstrue}

wordchoicegiven

This option will replace the choices shown by wordChoice with the correct choice. No indication of the wordChoice environment will be shown.

- 24 \newif\ifwordchoicegiven
- 25 \wordchoicegivenfalse
- 26 \DeclareOption{wordchoicegiven}{\wordchoicegiventrue}
- 27 \newif\iffirstinlinechoice% Support for other wordchoice command contents.
- 28 \firstinlinechoicetrue

2.2 Loading packages

```
Since we want \cancel to work, we load it here to avoid polluting the .jax output.
```

```
63 \RequirePackage[makeroom]{cancel}
```

Quite a few packages are required by the document class. This is a list of required packages. As packages are added to this list, we should include a comment as to where they are being utilized. This will help keep this list from being redundant and/or outdated.

```
64 \RequirePackage[inline] {enumitem}
65 \RequirePackage[pagestyles]{titlesec}
66 \RequirePackage{titletoc}
67 \RequirePackage{titling}
68 \RequirePackage{url}
69 \RequirePackage[table] {xcolor}
70 \RequirePackage{tikz}
71 \RequirePackage{pgfplots}
72 \usepgfplotslibrary{groupplots}
73 \usetikzlibrary{calc}
74 \RequirePackage{fancyvrb}
```

Load forloop for the problem environment dynamic naming and building.

```
75 \RequirePackage{forloop}
```

Now we load even more packages.

```
76 \RequirePackage{environ}% Included to allow saving of environment contents. This does *not* |
 77 \RequirePackage{amssymb}% Included to have access to math typeset.
 78 \RequirePackage{amsmath}% Included to have access to math typeset.
 79 \RequirePackage{amsthm}% Included to have access to math typeset.
 80 \ensuremath{\mbox{RequirePackage{xifthen}}\mbox{\% http://ctan.org/pkg/xifthen}}
 81 \RequirePackage{multido}% http://ctan.org/pkg/multido
 82 \RequirePackage{listings} %% is this required???
 83
 84 \RequirePackage{xkeyval}
 86 \RequirePackage{comment}
 87 (/classXimera)
Various packages must be loaded early to avoid polluting the .jax file.
 88 (*classXimera)
 89 \RequirePackage{gettitlestring}
 90 \RequirePackage{nameref}
 91 \RequirePackage{epstopdf}
 92 (/classXimera)
```

2.3Page setup

We want non-indented spaced-out paragraphs.

```
93 (*classXimera)
 94 \setlength{\parindent}{0pt}
 95 \setlength{\parskip}{5pt}
 96 (/classXimera)
To avoid weird margins in 2-sided mode, change the margins.
 97 (*classXimera)
 98 \oddsidemargin 62pt
 99 \evensidemargin 62pt
 100 \textwidth 345pt
 101 \headheight 14pt
 102 (/classXimera)
```

```
On the HTML side, there is more complicated page setup to perform.
 103 (*cfgXimera)
 104 \Preamble{xhtml}
 106 % We don't want to translate font suggestions with ugly wrappers like
```

```
107 % <span class="cmti-10"> for italic text
 108 \NoFonts
 109
110 % Don't output xml version tag
111 \Configure{VERSION}{}
113 % Output HTML5 doctype instead of the default for HTML4
114 \Configure{DOCTYPE}{\HCode{<!doctype html>\Hnewline}}
116 % Custom page opening
117 \Configure{\HTML}{\\HCode{\html lang="en">\\Hnewline}}{\\HCode{\\Hnewline</\html>}}
119~\% Reset <head>, aka delete all default boilerplate; alternatively set up new content
 120 \Configure{@HEAD}{\HCode{<meta name="generator" content="TeX4ht (http://www.cse.ohio-state.ee
 121 \Configure{@HEAD}{\HCode{<meta name="ximera" content="version 0.0.1" />\Hnewline}}
 122 \Configure{@HEAD}{\HCode{<link href="https://ximera.osu.edu/public/stylesheets/standalone.cs
 123 \Configure{@HEAD}{\HCode{<script type="text/javascript" async src="https://ximera.osu.edu/pul
 _{124} \langle / cfgXimera \rangle
Disable certain ligatures in HTML.
 125 (*htXimera)
 126 \usepackage{microtype}
 127 \DisableLigatures[f]{encoding=*}
 128 (/htXimera)
I am not sure what this does.
 129 (*htXimera)
 130 \NewEnviron{html}{\HCode{\BODY}}
 131 (/htXimera)
2.4
      Structure
2.4.1 Macros
Makes everymath display style even when inline, could be optional.
 132 (*classXimera)
 133 \everymath{\displaystyle}
 134 (/classXimera)
Ok not everything, we also need to configure "display style" limits.
 135 (*classXimera)
 136 \let\prelim\lim
 137 \renewcommand{\lim}{\displaystyle\prelim}
 138 (/classXimera)
       Theorem and theorem-like environments
On the web, a theorem is emitted as a special <div>.
139 (*htXimera)
140 \newcommand{\ConfigureTheoremEnv}[1]{%
141 \renewenvironment{#1}[1][]{\refstepcounter{problem}%
142 \ifthenelse{\equal{##1}{}}{}{%
```

```
\HCode{<span class="theorem-like-title">}##1\HCode{</span>}%
144 }}{}
145 \ConfigureEnv{#1}{\stepcounter{identification}\ifvmode \IgnorePar\fi \EndP\HCode{<div class=
146 }
147 (/htXimera)
```

The key is to make sure that the theorem environments are defined in a corresponding fashion on the web and on paper.

 380 \ConfigureQuestionEnv{hint}{hint}
 381 \ConfigureQuestionEnv{shuffle}{shuffle}
 382 (/htXimera)
2.4.6 Hints
Hint environments can be embedded inside problems.
 383 (*classXimera)
Create a counter that will track how deeply nested the current hint is
 384 \newcounter{hintLevel}
 385 \setcounter{hintLevel}{0}
```

hint

```
Create an empty shell to renew
```

386 \newenvironment{hint}{}{}

Now we renew the environment as needed, this should allow support for any transition code that treats some parts as a "handout" and some parts as non-handout. renewing the environment on the fly is a bit hacky.

```
387 \renewenvironment{hint}
```

```
388 {
            389 \ifhandout
            390 \setbox0\vbox\bgroup
            391 \else
            392 \begin{trivlist}\item[\hskip \labelsep\small\slshape\bfseries Hint:\hspace{2ex}]
            393 \small\slshape
            394 \fi
           Step up hint level to track the nested level of the hint. This will be used for problem
           numbering.
            395 \stepcounter{hintLevel}
            396 }
           397 {
            398 \setminus ifhandout
            399 \egroup\ignorespacesafterend
            400 \else
            401 \end{trivlist}
            402 \fi
           Detract from hint level counter to track hint nested level
            403 \addtocounter{hintLevel}{-1}

2.4.12 Foldable

The package mdframed is used to make pretty foldable, but the amsthm/mdframed conflict also messes up the .jax file so we don't load mdframed when performing the xake step. But even the below isn't enough to fix this.

605 %\iftikzexport\else\RequirePackage[framemethod=TikZ]{mdframed}\fi

```
Does it fold?
foldable
           606 (*classXimera)

                                                    2.5.6 Learning Outcomes
                                                    Specify a learning outcome, either at the level of a problem or an entire document in the
\outcome
                                                    preamble.
                                                        784 \langle *classXimera \rangle
                                                        785 \def\theoutcomes{}
                                                        786
                                                        787 \ifdefined\HCode%
                                                        788
                                                                                  \newcommand{\outcome}[1]{}
                                                        789 \else%
```

\immediate\write\outcomefile{\unexpanded{\outcome}{#1}}}

790

791

792

793 794

795

\fi% 796 (/classXimera)

\newwrite\outcomefile

\immediate\openout\outcomefile=\jobname.oc

These can appear in either the preamble or in problem environments. with pdflatex, we produce the .oc file which includes ALL the outcomes; in the tex4ht world, we just produce spans for the specific outcomes.

```
797 \*cfgXimera\)
798 \renewcommand{\outcome}[1]{
799 \Configure{@HEAD}{\HCode{<meta name="learning-outcome" content="#1"/>\Hnewline}}
800 }
801 % Sometimes there are no outcomes at all
802 \IffileExists{\jobname.oc}{\input{\jobname.oc}}{\}
803
804 \renewcommand{\outcome}[1]{%
805 \HCode{<span class="learning-outcome">#1</span>}
806 }
807 \/cfgXimera\
```

2.5.7 Labels and references

\label Labels and refs both generate anchors. A \label can be referenced from any file in the xourse.

\ref A \ref can connect one TEX file to another if they are in the same xourse.

```
811 \langle *htXimera \rangle
812 \renewcommand{\ref}[1]{\HCode{<a class="reference" href="\##1">#1</a>}}
813 <math>\langle /htXimera \rangle
```

2.6 Images

2.6.1 Images

image Place images inside an image environment. On paper, this centers the image. On the web, this provides additional benefits.

```
814 (*classXimera)
815 %\newenvironment{image}[1][]{\begin{center}}{\end{center}}
816 \NewEnviron{image}[1][3in]{%
817 \begin{center}\resizebox{#1}{!}{\BODY}\end{center}% resize and center
818 }
819 (/classXimera)
```

\alt Inside an image environment, \alt provides alt-text for assistive technology like screen-readers.

```
820 \( *classXimera \)
821 \newcommand{\alt}[1]{}
822 \( /classXimera \)
```

The image environment doesn't actually work in tex4ht as defined with NewEnviron; so this renewenvironment is needed. image-environment also gets formatted in a well, and when the user clicks on the image, it zooms in.

```
823 \*htXimera\
824 \newcounter{imagealt}
825 \setcounter{imagealt}{0}
826 \renewenvironment{image}[1][]{\stepcounter{imagealt}}%
827 \ifvmode \IgnorePar\fi \EndP%
828 \HCode{\div class="image-environment" role="img" aria-labelledby="image-alt-\arabic{imagealt}}
829 }{\HCode{\div>}}
830 \renewcommand{\alt}[1]{\HCode{\div style="display: none;" id="image-alt-\arabic{imagealt}">}
831 \/htXimera\
```

Although we accept many formats, SVG is preferred on the web. Since we have a different mechanism for producing alt text, we want to ignore tex4ht's own method fo producing alt text.

```
832 (*cfgXimera)
```

```
833 \DeclareGraphicsExtensions{.jpg,.png,.gif,.svg}
 834 \Configure{graphics*}
835 {svg}{
      {\Configure{Needs}{File: \Gin@base.svg}\Needs{}}
837
      \Picture[]{\csname Gin@base\endcsname.svg \csname a:Gin-dim\endcsname}%
838 }
839 \langle /cfgXimera \rangle
This is a hack to kill includegraphics commands in \documentclass{standalone}
840 (*cfgXimera)
841 \ifcsname ifstandalone\endcsname
842
     \ifstandalone
        \renewcommand\includegraphics[2][]{}
843
      \fi
844
      \fi
845
846 (/cfgXimera)
PGF sometimes causes trouble, but we simply don't care in tex4ht mode.
847 (*htXimera)
848 \newcommand{\pgfsyspdfmark}[3]{}
849 (/htXimera)
```

2.6.2 TikZ export

We generate SVGs and PNGs for any TikZ images, via the "externalize" feature of TikZ. Currently TikZ doesn't compile natively into the website because of how the xake bake compilation works. In order to make Tikz work, you need to get the tool mutool on the machine that is performing xake bake.

```
850 (*classXimera)
851 \ifdefined\HCode
852
     \tikzexporttrue
853 \fi

2.12.2 Feedback

feedback

An initially hidden environment that uncovers itself at an appropriate time. New Validator rewrite code added by Jason Nowell. Original code orovided by Jim Fowler Validator is an environment designed to run a custom check on answers (usually) using javascript code.

Define a placeholder command for validator and feedback.

```
1247 \ensuremath{\mbox{*classXimera}} 1248 \ensuremath{\mbox{Newcommand}{\mbox{\mbox{PH@Command}}{\{}}}
```

Validator should take an argument and detokenize it and display it at the start of the environment. The original Validator environment had everything framed in an mbox; presumably to make the text look a bit nicer, although this seems redundant with texttt. It shouldn't cause any harm so I have left it in for now.

```
1249 \newenvironment{validator}[1][]{
```

1250 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to 1251 \mbox{\texttt{\detokenize\expandafter{\PH@Command}}}% Now expand PH@Command once and then de 1252 }{}

First, if it's a handout, we want feedback to eat everything and then disappear entirely. So we do this:

1285 (/htXimera)

If this isn't a handout, then we want to display the Feedback by using a label, positioned and formated as a \item in a trivlist. It is important that we also detokenize the content of the optional argument, as it is likely to contain javascript or other code that latex won't be able to make sense of.

```
1261 \else
1262 \newenvironment{feedback}[1][attempt]{
1263
1264 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to
1265
1266 begin{trivlist}% Begin the trivlist to use formating of the "Feedback" label.
1267 \item[\hskip \labelsep\small\slshape\bfseries Feedback% Format the "Feedback" label. Don't fo
1268 (\texttt{\detokenize\expandafter{\PH@Command}}):% Format (and detokenize) the condition for
1269 \hspace{2ex}]\small\slshape% Insert some space before the actual feedback given.
1270 }{
1271 \end{trivlist}
1272 }
1273
1274 \fi
1275 (/classXimera)
Feedback environments take an optional parameter (which describes when the feedback
is to be provided)
1276 (*htXimera)
1277 \end{feedback} \{\end{feedback} \end{feedback} \label{feedback} \\
1278 \def\@feedbackattempt{\@feedbackcode[attempt]}
1279 \def\@feedbackcode[#1]{\stepcounter{identification}%
1280 \ifvmode \IgnorePar\fi \EndP%
1281 \verb| ifthenelse{\equal{#1}{attempt}}{\label{lem:lem:mode}} id="feedback" data-feedback="attempt" id="feedback="attempt" id="feedback="

1283 {\HCode{<div class="feedback" data-feedback="script" id="feedback\arabic{identification}"><se
1284 \def\endfeedback{\HCode{</div>}\IgnoreIndent}
```

2.12.3 Ungraded activities

ungraded

The ungraded environment is used to record that certain parts of activities should not be worth points. For example, if you want to use a multipleChoice as a survey question, you can place it inside an ungraded environment. On the LATEX side, the ungraded environment does nothing.

```
1286 (*classXimera)
1287 \newenvironment{ungraded}{}{}
1288 (/classXimera)

But on the html side, ungraded wraps the activities in a div in order to assign some weight to them for grading.

1289 (*htXimera)
1290 \renewenvironment{ungraded}{%
1291 \ifvmode \IgnorePar\fi \EndP\HCode{<div class="ungraded">}\IgnoreIndent%
1292 }{
1293 \ifvmode \IgnorePar\fi \EndP\HCode{</div>}}\IgnoreIndent%
1294 }
1295 (/htXimera)
```

2.13 Support for the web

1324 % Remove commands that use @

1328

1326 % Replace ##1 with #1 and so forth

1325 \immediate\write18{sed -i "/0/d" \jobname.jax}

2.13.1 MathJax support

```
When using mathjax, dump all the \newcommands to a .jax file.
   First, create the . jax file.
1296 (*classXimera)
1297 \footnotemark 1297 \ifdefined\HCode
1298
     \else
1299
       \newwrite\myfile
1300
       \immediate\openout\myfile=\jobname.jax
1301 \fi
1302 (/classXimera)
From only.dtx we must also create prompt on the MathJax side.
1303 (*classXimera)
1304 \ifdefined\HCode
1305
     \else
       \immediate\write\myfile{\unexpanded{\newenvironment}{prompt}{}}}
1306
1307 \fi
1308 (/classXimera)
Redefine newcommand appropriately.
1309 (*classXimera)
1310 \fi
1311 \else
1312 \let\@oldargdef\@argdef
1313 \long\def\@argdef#1[#2]#3{%
1315 \@oldargdef#1[#2]{#3}%
1316 }
1317
1318 \let\@OldDeclareMathOperator\DeclareMathOperator
1319 \renewcommand{\DeclareMathOperator}[2] \\ QOldDeclareMathOperator{#1}{#2}\immediate\write\myfi
1320
1321 \fi
1322 (/classXimera)
Include the jax'ed newcommands
1323 (*cfgXimera)
```

1327 \immediate\write18{sed -i "s/\string#\string\\([0-9]\string\\)/\string#\string\\1/g"

```
1329 \Configure{BVerbatimInput}{}{}{}{}
1331 \Configure{verbatiminput}{}{}{}{}
1332
1333 % Instead of a nonbreaking space, use a standard space
1334 \makeatletter
1335 \def\FV@Space{\space}
1336 \makeatother
1337
1338 % Include the mathjax newcommands in a math/tex script right at the beginning of the body
1339 \Configure{BODY}{%
1340 \HCode{<body>\Hnewline}%
1341 \Tg<div class="preamble">%
1342 \Tg<script type="math/tex">%
1343 \BVerbatimInput{\jobname.jax}%
1344 \Tg</script>%
1345 \IfFileExists{\jobname.ids}{\HCode{<script type="text/javascript">\Hnewline}%
1346 \BVerbatimInput{\jobname.ids}%
1347 \HCode{</script>\Hnewline}%
1348 \Tg</div>%
1349 }{}
1350 }{%
1351 \HCode{</body>\Hnewline}%
1352 }
Now I just need to add a newcommand command which outputs the appropriate new-
commands to MathJax; then this should be "good enough" for our purposes.
1353 \newtoks\eqtoks

         1390 \verb|\Configure{emph}{\ifvmode\ShowPar\fi\HCode{em>}}{\hCode{<em>}}}
         1391 (/cfgXimera)
\texttt
         Using \texttt emits a <code> tag.
         1392 (*cfgXimera)
         1393 \Configure{texttt}{\ifvmode\ShowPar\fi\HCode{<code>}}{\HCode{</code>}}
         1394 (/cfgXimera)
```

2.14 Tools

2.14.1 Suppress

suppres

The suppress environment is a good way to suppress output without commenting it. This way we can avoid many of the places we use environ package and this should also avoid most of the verbatim conflicts. This is code adapted from syntonly.sty.

```
1395 (*classXimera)
1396 \font\dummyft@=dummy \relax
1397 \def\suppress{%
1398
      \begingroup\par
1399
      \parskip\z@
1400
      \offinterlineskip
      \baselineskip=\z@skip
1401
      \lineskip=\z@skip
1402
1403
      \lineskiplimit=\maxdimen
1404
      \dummyft@
1405
      \count@\sixt@@n
1406
      \loop\ifnum\count@ >\z@
1407
        \advance\count@\m@ne
1408
        \textfont\count@\dummyft@
1409
        \scriptfont\count@\dummyft@
        \scriptscriptfont\count@\dummyft@
1410
1411
     \repeat
      \let\selectfont\relax
1412
1413
      \let\mathversion\@gobble
      \let\getanddefine@fonts\@gobbletwo
1414
1415
      \tracinglostchars\z@
      \frenchspacing
      \hbadness\@M}
1418 \def\endsuppress{\par\endgroup}
1419 (/classXimera)
```

2.14.2 The End

It seems that some of the files need to conclude with something or another.

```
1420 (*htXimera)
1421 \Hinput{ximera}
1422 (/htXimera)
1423 (*htXourse)
1424 \Hinput{xourse}
1425 (/htXourse)
1426 (*cfgXimera)
1427 \begin{document}
1428 \EndPreamble
1429 (/cfgXimera)
```

3 xourse.cls

```
notoc The default behavior of the class is to provide a table of contents listing all activities in the course. This option will supress this table of contents.

1431 \newif\ifnotoc
1432 \notocfalse
1433 \DeclareOption{notoc}{\notoctrue}

The default behavior of the class is to start each activity on a new page. This option will start activities without making a new page.

1434 \newif\ifnonewpage
1435 \nonewpagefalse
1436 \DeclareOption{nonewpage}{\nonewpagetrue}

1437 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{ximera}}
```

3.1 Activities

1441 (/classXourse)

1440 %

1438 \ProcessOptions\relax 1439 \LoadClass{ximera}

\begin{macrocode}

The core of the xourse system. It works by redefining the document environment, thus making the \begin and \end{document} of the subfile 'transparent' to the inclusion. The redefinition of \documentclass is analogous, just having a required and an optional arguments which mean nothing to \subfile.

Note that the new command \subfile calls for \skip@preamble within a group. The changes to document and \documentclass are undone after the inclusion of the subfile. Numbering starts a page too soon without this:

1447 \let\otherinput\input

Store usual \maketitle as \othermaketitle

1448 \let\othermaketitle\maketitle

\maketitle In a xourse file, \maketitle is redefined to give course packet title page and toc.

```
1449 \renewcommand{\maketitle}{ %
1450 \pagestyle{empty}
1451 \begin{center}
1452 ~\ %puts space at top of page to move title down.
1453 \vskip .25\textheight
1454 \hrulefill\\
1455 \vskip 1em
1456 \bfseries{\Huge \@title} \\
1457 \hrulefill\\
1458 \vskip 3em
1459 {\Large \@author}
1460 \vskip 2em
1461 {\large \@date}
1462 \end{center}
1463 \clearpage
```

When notoc option is used, we do not include a table of contents. Otherwise we include a table of contents in every course packet.

```
1464 \ifnotoc
1465 \else
1466 \tableofcontents\clearpage
```

```
1467 \clearpage
1468 \fi
Switch to main pagestyle, just like a document with document class ximera.
1469 \pagestyle{main}
Renew maketitle to usual definition.
1470 \let\maketitle\othermaketitle
And we finish with our redefinition of \maketitle.
1471 }
1472 \relax
1473 \langle / classXourse \rangle
```

3.1.1 Regular activities

\activity

Documents included with \activity will be included in the body of the xourse document. Any \input commands within included ximera documents will be ignored. Any \usepackage commands within included ximera documents will cause an error. Overlapping \newcommand definitions within multiple ximera documents included simultaneously will cause an error. The \activity command inputs the file name provided without \documentclass, without \begin{document}/\end{document} and without any inputs in the preamble of the included file.

```
1474 (*classXourse)
1475 \ifnonewpage
1476 \newcommand{\activity}[2][]{%
1477 \setkeys{activity}{#1}
      \renewcommand{\input}[1]{}
1479
      \begingroup\skip@preamble\otherinput{#2}\endgroup\par\vspace{\topsep}
1480
      \let\input\otherinput}
1481 \else
1482 \newcommand{\activity}[2][]{%
1483 \setkeys{activity}{#1}
     \renewcommand{\input}[1]{}
      \begingroup\skip@preamble\otherinput{#2}\endgroup\clearpage
      \let\input\otherinput}
1486
1487 \fi
1488 \relax
1489 (/classXourse)
1490 (*htXourse)
1491 \renewcommand\activity[2][]{%
1492 \ifvmode \IgnorePar\fi \EndP\HCode{<a class="activity card \activitystyle" href="#2" data-op
1493 }
1494 (/htXourse)
   When running xake, we can just ignore activities
1495 (*classXourse)
1496 \ifxake
1497 \renewcommand\activity[2][]{}
```

3.1.2 Practice activities

1498 \fi

1499 (/classXourse)

\practice Like \activity but not expecting a title. 1500 (*classXourse) 1501 \ifhandout 1502 \newcommand{\practice}[2][]{ 1503 \setkeys{practice}{#1}%!!!!! \renewcommand{\input}[1]{} 1505 \begingroup\skip@preamble\otherinput{#2}\endgroup 1506 \let\input\otherinput} 1507 \else

```
1508 \newcommand{\practice}[2][]{\texttt{\detokenize{#2}}}% gives file name for practice
                1509 \setkeys{practice}{#1}%!!!!!
                1510
                      \renewcommand{\input}[1]{}
                1511
                      \begingroup\skip@preamble\otherinput{#2}\endgroup
                      \let\input\otherinput}
                1512
                1513 \fi
                1514 \relax
                1515 (/classXourse)
                    The practice environment does nothing, but will eventually produce exercises at the
                end of an activity
                1516 (*classXourse)
                1517 \ifxake
                1518 \renewcommand\practice[2][]{}
                1519 \fi
                1520 (/classXourse)
                    I suppose it is reasonable for practice cards to NOT have an activity tyle, since the
                activitystyle is basically PRACTICE.
                1521 (*htXourse)
                1522 \renewcommand\practice[2][]{%
                      \ifvmode\IgnorePar\fi\EndP%
                      \HCode{<a class="activity card practice" href="#2" data-options="#1">#2</a>}%
                1524
                1525
                      \IgnoreIndent%
                1526 }
                1527 (/htXourse)
                       Sectioning
                3.2
                Makes the table of contents look a bit better. This can be redefined in the preamble if
     \section
                you do not like the appearance. The name of a section inside an activity.
                1528 (*classXourse)
                1529 \renewcommand*\l@section{\@dottedtocline{1}\{1.5em\}\{4.2em\}\}
                1530 (/classXourse)
  \subsection
                The name of a subsection inside an activity.
                1531 (*classXourse)
                1532 \renewcommand*\l@subsection{\@dottedtocline{2}{3.8em}{4.2em}}
                1533 (/classXourse)
                Xourse files can have parts. The name of a large part of a xourse.
        \part
                1534 (*htXourse)
                1535 \newcounter{ximera@part}
                1536 \setcounter{ximera@part}{0}
                1537 \renewcommand\part[1]{%
                1538 \stepcounter{ximera@part}%
                1539 \ifvmode \IgnorePar\fi \EndP%
                1540 \HCode{<h1 id="part\arabic{ximera@part}" class="card part">#1</h1>}%
                1541 \IgnoreIndent%
                1542 }
                1543 (/htXourse)
                Paragraph commands emit spans. A small heading.
   \paragraph
                1544 (*cfgXimera)
                1545 \renewcommand{\paragraph}[1]{%
                1546
                      \HCode{<span class="paragraphHead">}%
                      #1%
                1547
                      \HCode{</span>}\par\IgnorePar}
                1549 (/cfgXimera)
                An even smaller heading.
\subparagraph
                1550 (*cfgXimera)
                1551 \renewcommand{\subparagraph}[1]{%
                1552
                      \HCode{<span class="subparagraphHead">}%
                1553
                      #1%
```

```
1554 \HCode{</span>}\par\IgnorePar} 1555 \langle /cfgXimera \rangle
```

3.3 Grading by points

graded The graded environment does nothing in latex, but in html, it wraps the activities in a div in order to assign some weight to them for grading.

```
1556 (*classXourse)
1557 \newenvironment{graded}[1]{}{}
1558 (/classXourse)
```

So indeed this environment in html wraps the activities in a div in order to assign some number of points to them.

3.4 Logos

\logo A logo for the xourse.

```
1566 (*classXourse)
1567 \newcommand*{\logo}[1]{%
      \ifx\@onlypreamble\@notprerr
1568
        \ClassError{xourse}{logo can only be used in the preamble}
1569
          {Move your logo command to the preamble}
1570
      \else %
1571
1572
        \IfFileExists{#1}%
1573
          {\gdef\xourse@logo{#1}}%
1574
          {\ClassError{xourse}{logo file does not exist}
1575
            {To use logo, make sure that the referenced image file exists}}%
1576
      \fi%
1577 }
1578
1579 (/classXourse)
   The xourse logo is an og:image in the opengraph taxonomy.
1580 (*htXourse)
1581 \Configure{@HEAD}{%
```

1581 \Configure{@HEAD}{% 1582 \HCode{<meta name="og:image" content="}% 1583 \xourse@logo%

1584 \HCode{" />\Hnewline}}

1585 (/htXourse)
