# ximera — Simultaneously write print and online interactive materials.\*

Jim Fowler Jeramiah Hocutt Oscar Levin Jason Nowell Wim Obbels Hans Parshall Bart Snapp

Released 2024/05/12

#### Abstract

"Ximera begins where TEX ends." The ximera class aids in the creation of handouts, worksheets, exercises, and sections of textbooks to be used either individually or "glued" together via a xourse file. All ximera documents can be deployed in an online interactive form via xake See: Ximera Project and the source code on GitHub.

#### 1 Introduction

Ximera, pronounced "chimera," (Ximera: Interactive, Mathematics, EResources, for All) is an open-source platform that provides tools for authoring and publishing (PDF and Online), open-source, interactive educational content, such as textbooks, assessments, and online courses. The Ximera document class provides the following features:

Formatting for different domains The Ximera document class provides built-in support for formatting documents in both PDF and online formats, which can be a big time-saver for authors. Additionally, it allows for the simultaneous creation of solution manuals and teaching editions, which can be especially useful for educators.

Compiling individually or as a whole With the Ximera document class, authors can easily compile individual documents or an entire collection of documents. This flexibility can be helpful when making changes to specific documents without having to re-compile the entire collection. Moreover, this allows an author to share large portions of a text with another, with minimal changes.

Interactive content The Ximera document class allows for the inclusion of interactive content, such as answer boxes that are validated by a client-side computer algebra system. Additionally, it allows for the embedding of YouTube videos, Desmos graphs, and GeoGebra interactives.

All content displayed By default, the Ximera document class displays all content to the author. This means the author see what the students see, along with answers and solutions, and links (that can be checked) to various interactive elements (when deployed, the interactive elements are truly embedded). This can be especially helpful for catching errors or inconsistencies in the content.

Online examples can be found at

https://go.osu.edu/ximera-examples

<sup>\*</sup>This file describes version v1.5.1, last revised 2024/05/12.

#### 2 ximera.cls

- 1 (\*classXimera)
- 2 \newif\ifnumberedProblems
- 3 \numberedProblemsfalse% Default to no numbers, as that was previous behavior.
- 4 \DeclareOption{onlineProblemNumbers}{\numberedProblemstrue}
- 5 (/classXimera)

## 2.1 Options for the class

We start by listing the options for the ximera document class. Note, since the xourse class is based on the ximera class, all listed options are available there too.

```
6 (*classXimera)
```

The default behavior of the class is to display **all** content. This means that if any questions are asked, all answers are shown. Moreover, some content will only have a meaningful presentation when displayed online. When compiled without any options, this content will be shown too. This option will supress such content and generate a reasonable printiable "handout."

- 7 \newif\ifhandout
- 8 \handoutfalse
- 9 \DeclareOption{handout}{\handouttrue}

By default, authors are listed at the bottom of the first page of a document. This option will supress the listing of the authors.

- 10 \newif\ifnoauthor
- 11 \noauthorfalse
- 12 \DeclareOption{noauthor}{\noauthortrue}

By default, learning outcomes are listed at the bottom of the first page of a document. This option will supress the listing of the learning outcomes.

- 13 \newif\ifnooutcomes
- $14 \setminus nooutcomesfalse$
- 15 \DeclareOption{nooutcomes}{\nooutcomestrue}

instructornotes This option will turn on (and off) notes written for the instructor.

- 16 \newif\ifinstructornotes
- 17 \instructornotesfalse
- 18 \DeclareOption{instructornotes}{\instructornotestrue}

noinstructornotes This option will turn off (and on) notes written for the instructor.

19 \DeclareOption{noinstructornotes}{\instructornotestrue}

hints When the handout options is used, hints are not shown. This option will make hints visible in handout mode.

- 20 \newif\ifhints
- 21 \hintsfalse
- 22 \DeclareOption{hints}{\hintstrue}

newpage This option will start each problem-like environment (exercise, question, problem, and exploration) start on a new page.

- 23 \newif\ifnewpage
- 24 \newpagefalse
- $25 \ensuremath{\verb| DeclareOption{newpage}{\ensuremath{\verb| Newpagetrue|}}}$

numbers This option will number the titles of the activity. By default the activities are unnumbered

- $26 \neq 16$
- 27 \numbersfalse
- 28 \DeclareOption{numbers}{\numberstrue}

wordchoicegiven This option will replace the choices shown by wordChoice with the correct choice. No indication of the wordChoice environment will be shown.

```
29 \newif\ifwordchoicegiven
30 \wordchoicegivenfalse
31 \DeclareOption{wordchoicegiven}{\wordchoicegiventrue}
32 \mbox{\ensuremath{\mbox{\sc Number} other}}\mbox{\sc Command contents.}
33 \firstinlinechoicetrue
35 \newif\ifxake
36 \xakefalse
37 \DeclareOption{xake}{\xaketrue}
39 \newif\iftikzexport
40 \tikzexportfalse
41 \DeclareOption{tikzexport}{%
    \tikzexporttrue%
42
    \handoutfalse%
    \numbersfalse%
44
45
    \newpagefalse%
46
    \hintsfalse%
47
    \nooutcomesfalse%
48 }
49
50 \DeclareOption*{%
    \PassOptionsToClass{\CurrentOption}{article}%
51
52 }
53 \ProcessOptions\relax
54 \LoadClass{article}
56 \ifdefined\HCode

   \hintsfalse%
63 \nooutcomesfalse%
64\fi
65 (/classXimera)
66 (*classXimera)
```

#### 2.2 Loading packages

Since we want \cancel to work, we load it here to avoid polluting the .jax output.

67 \RequirePackage[makeroom]{cancel}

Quite a few packages are required by the document class. This is a list of required packages. As packages are added to this list, we should include a comment as to where they are being utilized. This will help keep this list from being redundant and/or outdated.

```
68 \RequirePackage[inline] \{enumitem\}
69 \RequirePackage[pagestyles] \{titlesec\}
70 \RequirePackage\{titletoc\}
71 \RequirePackage\{titling\}
72 \RequirePackage\{url\}
73 \RequirePackage\{url\}
74 \RequirePackage\{tikz\}
75 \RequirePackage\{pfplots\}
76 \usepgfplotslibrary\{groupplots\}
77 \usetikzlibrary\{calc\}
78 \RequirePackage\{fancyvrb\}
```

```
Load forloop for the problem environment dynamic naming and building.
 79 \RequirePackage{forloop}
Now we load even more packages.
 80 \RequirePackage{environ}\% Included to allow saving of environment contents. This does *not* 1
 81 \RequirePackage{amssymb}% Included to have access to math typeset.
 82 \RequirePackage{amsmath}% Included to have access to math typeset.
 83 \RequirePackage{amsthm}% Included to have access to math typeset.
 84 \RequirePackage{xifthen}% http://ctan.org/pkg/xifthen
 85 \RequirePackage{multido}% http://ctan.org/pkg/multido
 86 \RequirePackage{listings} %% is this required???
 87
 88 \RequirePackage{xkeyval}
 89
 90 \RequirePackage{currfile}
 91 \RequirePackage{comment}
 92 (/classXimera)
Various packages must be loaded early to avoid polluting the .jax file.
 93 (*classXimera)
 94 \RequirePackage{gettitlestring}
 95 \RequirePackage{nameref}
 96 \RequirePackage{epstopdf}
 97 (/classXimera)
2.3
      Page setup
We want non-indented spaced-out paragraphs.
 98 \langle *classXimera \rangle
 99 \setlength{\parindent}{0pt}
 100 \setlength{\parskip}{5pt}
 101 (/classXimera)
To avoid weird margins in 2-sided mode, change the margins.
102 (*classXimera)
103 \oddsidemargin 62pt
 104 \evensidemargin 62pt
 105 \textwidth 345pt
 106 \headheight 14pt
107 (/classXimera)
On the HTML side, there is more complicated page setup to perform.
 108 (*cfgXimera)
109 \Preamble{xhtml, mathjax}
111 % We don't want to translate font suggestions with ugly wrappers like
112 % <span class="cmti-10"> for italic text
113 \NoFonts
115 % Don't output xml version tag
116 % \Configure{VERSION}{}
118 \% Output HTML5 doctype instead of the default for HTML4
119 % \Configure{DOCTYPE}{\HCode{<!doctype html>\Hnewline}}
121 % Custom page opening
 122 % \Configure{HTML}{\HCode{<html lang="en">\Hnewline}}{\HCode{\Hnewline</html>}}

#### 2.4.6 Hints

418 {

hint (env.) Hint environments can be embedded inside problems.

```
404 (*classXimera)
```

Create a counter that will track how deeply nested the current hint is

```
405 \newcounter{hintLevel} 406 \setcounter{hintLevel}{0}
```

Create an empty shell to renew

407 \newenvironment{hint}{}{}

Now we renew the environment as needed, this should allow support for any transition code that treats some parts as a "handout" and some parts as non-handout. renewing the environment on the fly is a bit hacky.

```
408 \renewenvironment{hint}
409 {
     \ifhandout
410
411
      \setbox0\vbox\bgroup
412

## 2.5.6 Only in HTML or PDF

Ximera provides several techniques to display some content only in the PDF, or only online. The prompt environment can be used to hide the data-entry part of a problem from the PDF: it's contents only get displayed online.

The lower level commands \pdfOnly and \htmlOnly also limit the output to either PDF or online, similarly to the environments onlyPdf and onlyHtml.

If \mmPrintHtmlOnlyAlsoInPdf is set, the online/html only things are printed in the PDF anyway (e.g. for review).

Unfortunately it is not possible in LATEX to have a command and an environment with the same name. We opted for the above (confusing...) names.

For backward compatibility, the deprecated environment onlineOnly is identical to onlyHtml.

For more advanced usage also commands \ifonline and ifonlineTF are provided.

The technique used to distinguish between the PDF-version and the online HTML-version is always the existence of the TeX4ht macro \HCode. Older distinctions such as \ifxake, ifhandout or \iftikzexport should no longer be used for this purpose.

```

#### 2.6.2 TikZ export

 $2024\colon$  We DON NOT ANYMORE generate SVGs and PNGs for any TikZ images, via the "externalize" feature of TikZ.

Previously TikZ didn't compile natively into the website because of how the xake bake compilation works. In order to make Tikz work, you need to get the tool mutool on the machine that is performing xake bake.

#### 2.12 Select all

1332 (/htXimera)

1330 \renewenvironment{multipleChoice@}{\refstepcounter{problem}}{}%

In the future we need this to (optionally) be displayed in the problem, while the actual code lives in the solution. Here is how this could be implemented: Like the title/maketitle commands, the multiple-choice could be stored in \themultiplechoice, flip a boolean, and execute \makemultiplechoice at the \end of the problem. We should also make a command called \showchoices that will show choices in the handout.

On the web, selectAll is handled just like multipleChoice.

#### 2.12.1 Free response

```

#### 2.12.2 Feedback

feedback (env.) An initially hidden environment that uncovers itself at an appropriate time. New Validator rewrite code added by Jason Nowell. Original code orovided by Jim Fowler Validator is an environment designed to run a custom check on answers (usually) using javascript code.

Define a placeholder command for validator and feedback.

```
1395 (*classXimera)
1396 \newcommand{\PH@Command}{}
```

Validator should take an argument and detokenize it and display it at the start of the environment. The original Validator environment had everything framed in an mbox; presumably to make the text look a bit nicer, although this seems redundant with texttt. It shouldn't cause any harm so I have left it in for now.

```
1397 \newenvironment{validator}[1][]{
```

\def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" of the larget for "\expandafter" of "\exp

First, if it's a handout, we want feedback to eat everything and then disappear entirely. So we do this:

If this isn't a handout, then we want to display the Feedback by using a label, positioned and formated as a \item in a trivlist. It is important that we also detokenize the content of the optional argument, as it is likely to contain javascript or other code that latex won't be able to make sense of.

```
won't be able to make sense of.
1409 \else
1410 \newenvironment{feedback}[1][attempt]{
1412 \edef\PH@Command{\GetTranslation{#1}}% Use PH@Command to hold the content and be a target for
1413
1414 \begin{trivlist}% Begin the trivlist to use formating of the "Feedback" label.
1415 \item[\hskip \labelsep\small\slshape\bfseries \GetTranslation{Feedback}% Format the "Feedback
1416 \ifonlineTF{% If the feedback is on a pdf, we don't need to detokenize - which messes with the
1417 \ (\text{texttt{expandafter} detokenize}) \ \textit{X} \ \textit{X} \ \textit{X} \ \textit{Y} \ \textit{Y}
1418 {(\expandafter\texttt{\PH@Command})}:% No need for detokenize in the pdf version
1419 \hspace{2ex}]\small\slshape% Insert some space before the actual feedback given.
1420 }{
1421 \end{trivlist}
1422 }
1423
1424 \fi
1425 (/classXimera)
Feedback environments take an optional parameter (which describes when the feedback
is to be provided)
1426 \langle *htXimera \rangle

```

1434 \def\endfeedback{\HCode{</div>}\IgnoreIndent}

1435 (/htXimera)

#### 2.12.3 Ungraded activities

ungraded (env.) The ungraded environment is used to record that certain parts of activities should not be worth points. For example, if you want to use a multipleChoice as a survey question, you can place it inside an ungraded environment. On the IATEX side, the ungraded environment does nothing.

```
1436 (*classXimera)
1437 \newenvironment{ungraded}{}{}
1438 \(/classXimera\)
But on the html side, ungraded wraps the activities in a div in order to assign some weight to them for grading.

1439 \(*htXimera\)

#### 2.14.2 The End

It seems that some of the files need to conclude with something or another.

```
1542 (*htXimera)
1543 \Hinput{ximera}
1544 \/htXimera\)
1545 (*htXourse)
1546 \Hinput{xourse}
1547 \/htXourse\)
1548 (*cfgXimera)
1549 \begin{document}
1550 \EndPreamble
1551 \/cfgXimera\)
```

# 3 xourse.cls

```
1552 (*classXourse)
```

notoc The default behavior of the class is to provide a table of contents listing all activities in the course. This option will supress this table of contents.

```
1553 \newif\ifnotoc
1554 \notocfalse
1555 \DeclareOption{notoc}{\notoctrue}
```

nonewpage The default behavior of the class is to start each activity on a new page. This option will start activities without making a new page.

```
1556 \newif\ifnonewpage
1557 \nonewpagefalse
1558 \DeclareOption{nonewpage}{\nonewpagetrue}
1559 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{ximera}}
1560 \ProcessOptions\relax
1561 \LoadClass{ximera}
1562 % \begin{macrocode}
1563 \( \classXourse \)
```

#### 3.1 Activities

The core of the xourse system. It works by redefining the document environment, thus making the \begin and \end{document} of the subfile 'transparent' to the inclusion. The redefinition of \documentclass is analogous, just having a required and an optional arguments which mean nothing to \subfile.

```
1564 \enskip@preamble\} \{\% \\ 1565 \enskip@preamble\} \{\% \\ 1566 \enskip@preamble\} \{\enskip@neamble\} \{\enskip@neamble} \{\e
```

Note that the new command \subfile calls for \skip@preamble within a group. The changes to document and \documentclass are undone after the inclusion of the subfile.

Numbering starts a page too soon without this:

```
1569 \ \text{let}\ \text{other} \ \text{input}
```

Store usual \maketitle as \othermaketitle

1570 \let\othermaketitle\maketitle

\maketitle In a xourse file, \maketitle is redefined to give course packet title page and toc.

```
1571 \renewcommand{\maketitle}{ %
1572 \pagestyle{empty}
1573 \begin{center}
1574 ~\\ %puts space at top of page to move title down.
1575 \vskip .25\textheight
1576 \hrulefill\\
1577 \vskip 1em
1578 \bfseries{\Huge \@title} \\
1579 \hrulefill\\
1580 \vskip 3em
1581 {\Large \@author}
1582 \vskip 2em
1583 {\large \@date}
1584 \end{center}
1585 \clearpage
```

When notoc option is used, we do not include a table of contents. Otherwise we include a table of contents in every course packet.

```
1586 \ifnotoc
1587 \else
1588 \tableofcontents\clearpage
1589 \clearpage
1590 \fi
```

Switch to main pagestyle, just like a document with documentclass ximera.

1591 \pagestyle{main}

Renew maketitle to usual definition.

1592 \let\maketitle\othermaketitle

And we finish with our redefinition of \maketitle.

```
1593 }
1594 \relax
1595 ⟨/classXourse⟩
```

#### 3.1.1 Regular activities

\activity Documents included with \activity will be included in the body of the xourse document. Any \input commands within included ximera documents will be ignored. Any \usepackage commands within included ximera documents will cause an error. Overlapping \newcommand definitions within multiple ximera documents included simultaneously will cause an error. The \activity command inputs the file name provided without \documentclass, without \begin{document}/\end{document} and without any inputs in the preamble of the included file.

```
1596 (*classXourse)
1597 \ifnonewpage
1598 \newcommand{\activity}[2][]{%
1599 \setkeys{activity}{#1}
     \renewcommand{\input}[1]{}
1600
      \begingroup\skip@preamble\otherinput{#2}\endgroup\par\vspace{\topsep}
1601
     \let\input\otherinput}
1602
1603 \else
1604 \newcommand{\activity}[2][]{%
1605 \setkeys{activity}{#1}
      \renewcommand{\input}[1]{}
1607
      \begingroup\skip@preamble\otherinput{#2}\endgroup\clearpage
```

```
\let\input\otherinput}
1609 \fi
1610 \relax
1611 (/classXourse)
1612 (*htXourse)
1613 \renewcommand\activity[2][]{%
1614 \ifvmode \IgnorePar\fi \EndP\HCode{<a class="activity card \activitystyle" href="#2" data-op
1615 }
1616 (/htXourse)
   When running xake, we can just ignore activities
1617 (*classXourse)
1618 \ifxake
1619 \renewcommand\activity[2][]{}
1620 \fi
1621 (/classXourse)
```

#### 3.1.2 Practice activities

\practice Like \activity but not expecting a title.

```
1622 (*classXourse)
1623 \ifhandout
1624 \newcommand{\practice}[2][]{
1625 \setkeys{practice}{#1}%!!!!!
      \renewcommand{\input}[1]{}
1627
      \begingroup\skip@preamble\otherinput{#2}\endgroup
1628
      \let\input\otherinput}
1629 \else
1630 \newcommand{\practice}[2][]{\texttt{\detokenize{#2}}}% gives file name for practice
1631 \setkeys{practice}{#1}%!!!!!
      \renewcommand{\input}[1]{}
1632
1633
      \begingroup\skip@preamble\otherinput{#2}\endgroup
      \let\input\otherinput}
1634
1635 \fi
1636 \relax
1637 (/classXourse)
   The practice environment does nothing, but will eventually produce exercises at the
```

end of an activity

```
1638 (*classXourse)
1639 \ifxake
1640 \renewcommand\practice[2][]{}
1641 \fi
1642 (/classXourse)
```

I suppose it is reasonable for practice cards to NOT have an activity tyle, since the activitystyle is basically PRACTICE.

```
1643 (*htXourse)
1644 \renewcommand\practice[2][]{%
      \ifvmode\IgnorePar\fi\EndP%
      \HCode{<a class="activity card practice" href="#2" data-options="#1">#2</a>}%
1646
      \IgnoreIndent%
1647
1648 }
1649 (/htXourse)
```

#### 3.2 Sectioning

Makes the table of contents look a bit better. This can be redefined in the preamble if \section you do not like the appearance. The name of a section inside an activity.

```
1650 (*classXourse)
1651 \ \texttt{\localine} \{1\} \{1.5 \texttt{em}\} \{4.2 \texttt{em}\} \}
1652 (/classXourse)
```

```
\subsection The name of a subsection inside an activity.
                                           1653 (*classXourse)
                                           1654 \enskip 165
                                           1655 (/classXourse)
                         \part Xourse files can have parts. The name of a large part of a xourse.
                                           1656 (*htXourse)
                                           1657 \newcounter{ximera@part}
                                           1658 \setcounter{ximera@part}{0}
                                           1659 \renewcommand\part[1]{%
