# ximera — Simultaneously write print and online interactive materials.\*

Jim Fowler — Jeramiah Hocutt — Oscar Levin — Jason Nowell — Hans Parshall — Bart Snapp

Released 2018/10/28

#### Abstract

"Ximera begins where TEX ends." The ximera class aids in the creation of handouts, worksheets, exercises, and sections of textbooks to be used either individually or "glued" together via a xourse file. All ximera documents can be deployed in an online interactive form via xake See: Ximera Project and the source code on GitHub.

# 1 Introduction

Ximera, pronounced "chimera," (Ximera: Interactive, Mathematics, EResources, for All) is an open-source platform that provides tools for authoring and publishing (PDF and Online), open-source, interactive educational content, such as textbooks, assessments, and online courses. The Ximera document class provides the following features:

Formatting for different domains The Ximera document class provides built-in support for formatting documents in both PDF and online formats, which can be a big time-saver for authors. Additionally, it allows for the simultaneous creation of solution manuals and teaching editions, which can be especially useful for educators

Compiling individually or as a whole With the Ximera document class, authors can easily compile individual documents or an entire collection of documents. This flexibility can be helpful when making changes to specific documents without having to re-compile the entire collection. Moreover, this allows an author to share large portions of a text with another, with minimal changes.

Interactive content The Ximera document class allows for the inclusion of interactive content, such as answer boxes that are validated by a client-side computer algebra system. Additionally, it allows for the embedding of YouTube videos, Desmos graphs, and GeoGebra interactives.

All content displayed By default, the Ximera document class displays all content to the author. This means the author see what the students see, along with answers and solutions, and links (that can be checked) to various interactive elements (when deployed, the interactive elements are truly embedded). This can be especially helpful for catching errors or inconsistencies in the content.

# 2 ximera.cls

#### 2.1 Options for the class

We start by listing the options for the ximera document class. Note, since the xourse class is based on the ximera class, all listed options are available there too.

1 (\*classXimera)

<sup>\*</sup>This file describes version v1.0, last revised 2018/10/28.

- handout The default behavior of the class is to display all content. This means that if any questions are asked, all answers are shown. Moreover, some content will only have a meaningful presentation when displayed online. When compiled without any options, this content will be shown too. This option will supress such content and generate a reasonable printiable "handout."
  - 2 \newif\ifhandout
  - 3 \handoutfalse
  - 4 \DeclareOption{handout}{\handouttrue}
- noauthor By default, authors are listed at the bottom of the first page of a document. This option will supress the listing of the authors.
  - 5 \newif\ifnoauthor
  - 6 \noauthorfalse
  - 7 \DeclareOption{noauthor}{\noauthortrue}
- nooutcomes By default, learning outcomes are listed at the bottom of the first page of a document. This option will supress the listing of the learning outcomes.
  - $8 \neq 8$
  - 9 \nooutcomesfalse
  - 10 \DeclareOption{nooutcomes}{\nooutcomestrue}
- instructornotes This option will turn on (and off) notes written for the instructor.
  - 11 \newif\ifinstructornotes
  - 12 \instructornotesfalse
  - 13 \DeclareOption{instructornotes}{\instructornotestrue}

noinstructornotes This option will turn off (and on) notes written for the instructor.

14 \DeclareOption{noinstructornotes}{\instructornotestrue}

hints When the handout options is used, hints are not shown. This option will make hints visible in handout mode.

- 15 \newif\ifhints
- 16 \hintsfalse
- 17 \DeclareOption{hints}{\hintstrue}
- newpage This option will start each problem-like environment (exercise, question, problem, and exploration) start on a new page.
  - 18 \newif\ifnewpage
  - 19 \newpagefalse
  - 20 \DeclareOption{newpage}{\newpagetrue}
- numbers This option will number the titles of the activity. By default the activities are unnumbered.
  - 21 \newif\ifnumbers
  - $22 \setminus numbersfalse$
  - 23 \DeclareOption{numbers}{\numberstrue}
- wordchoicegiven This option will replace the choices shown by wordChoice with the correct choice. No indication of the wordChoice environment will be shown.
  - 24 \newif\ifwordchoicegiven
  - $25\ \mbox{\wordchoicegivenfalse}$

  - $27\mbox{\ensuremath{\mbox{\sc Nupport}}}$  for other wordchoice command contents.
  - 28 \firstinlinechoicetrue
  - 29
  - $30 \neq 30$
  - 31 \xakefalse
  - 32 \DeclareOption{xake}{\xaketrue}
  - 33
  - $34 \neq 34$
  - $35 \setminus tikzexportfalse$

```
36 \DeclareOption{tikzexport}{%
    \tikzexporttrue%

```

# 2.2 Loading packages

Since we want \cancel to work, we load it here to avoid polluting the .jax output.

```
63 \RequirePackage[makeroom] {cancel}
```

64 \RequirePackage[inline]{enumitem}

Quite a few packages are required by the document class. This is a list of required packages. As packages are added to this list, we should include a comment as to where they are being utilized. This will help keep this list from being redundant and/or outdated.

```
65 \RequirePackage[pagestyles]{titlesec}
66 \RequirePackage{titletoc}
67 \RequirePackage{titling}
68 \RequirePackage{url}
69 \RequirePackage[table]{xcolor}
70 \RequirePackage{tikz}
71 \RequirePackage{pgfplots}
72 \usepgfplotslibrary{groupplots}
73 \usetikzlibrary{calc}
74 \RequirePackage{fancyvrb}

Load forloop for the problem environment dynamic naming and building.
75 \RequirePackage{forloop}

Now we load even more packages.
```

```
76 \RequirePackage{environ}% Included to allow saving of environment contents. This does *not* ]
77 \RequirePackage{amssymb}% Included to have access to math typeset.
78 \RequirePackage{amsmath}% Included to have access to math typeset.
79 \RequirePackage{amsthm}% Included to have access to math typeset.
80 \RequirePackage{xifthen}% http://ctan.org/pkg/xifthen
81 \RequirePackage{multido}% http://ctan.org/pkg/multido
82 \RequirePackage{listings} %% is this required???
83
84 \RequirePackage{xkeyval}
85
86 \RequirePackage{comment}
87 \/classXimera\
```

```
Various packages must be loaded early to avoid polluting the .jax file.
 88 (*classXimera)
 89 \RequirePackage{gettitlestring}
 90 \ \texttt{\ensuremath{\mbox{RequirePackage}\{nameref\}}}
 91 \RequirePackage{epstopdf}
 92 (/classXimera)

#### **2.4.12** Foldable

640 %\else

The package mdframed is used to make pretty foldable, but the amsthm/mdframed conflict also messes up the .jax file so we don't load mdframed when performing the xake step. But even the below isn't enough to fix this.

605 %\iftikzexport\else\RequirePackage[framemethod=TikZ]{mdframed}\fi

```
foldable (env.) Does it fold?
                606 (*classXimera)

                                   677 \renewenvironment{leash}[1]{\ifvmode \IgnorePar\fi \EndP\HCode{<div style="overflow: auto; here..."
                                   678 (/htXimera)
                                                    Document metadata
                                 2.5
                                 2.5.1
                                                  Metadata
```

To encourage authors to include relevant parseable metadata in the preamble, we define some currently ignored commands.

680 \newcommand{\license}{\excludecomment} 681 \/classXimera\/

\acknowledgement

In the preamble, use **\acknowledgement** to credit others who contributed to the intellectual content beside the author.

```
682 (*classXimera)
683 \newcommand{\acknowledgement}{\excludecomment}
684 (/classXimera)
```

\tag In the preamble, a \tag provides a free-form taxonomy.

685 (\*classXimera)

```
686 \renewcommand{\tag}{\excludecomment}
 687 (/classXimera)
On the HTML side, we mark the file as the appropriate kind of object—either activity
or xourse.
688 (*htXourse)
689 % Mark this as a xourse file
 690 \Configure{@HEAD}{\HCode{<meta name="description" content="xourse" />\Hnewline}}
691 (/htXourse)
2.5.2 Abstract
```

abstract (env.) Every activity should include a short abstract.

```
692 (*classXimera)
693 \let\abstract\relax
694 \let\endabstract\relax
695 % Use of environ package, may want to find a better way.
696 \ensuremath{\verb|NewEnviron{abstract}{\protected@xdef\\theabstract{\BODY}}}
697 (/classXimera)
```

The abstract has been stored in \theabstract and should be emitted as a div, but confusingly I guess <div class="abstract"> is defined somewhere deeper inside tex4ht, so the code below is probably unnecessary.

```
698 (*cfgXimera)
699 \let\abstract\relax
700 \let\endabstract\relax
701 (/cfgXimera)
```

### 2.5.3 Titles and authors

#### 2.5.4 Authors

702 (\*classXimera)

\author Activities have authors. Warn the user if no author is provided.

```
703 \let\@emptyauthor\@author
 704 \def\author#1{\gdef\@author{#1}}
 705 \def\@author{\@latex@warning@no@line{No \noexpand\author given}}
706 (/classXimera)
Include author name in meta tags
 707 (*htXimera)
708 \Configure{@HEAD}{\HCode{<meta name="author" content="}\@author\HCode{" />\Hnewline}}
 709 (/htXimera)
```

The \and command would emit tabular environments which really should not appear in a meta tag.

710 (htXimera | classXimera)\def\and{and }

#### 2.5.5 Title

\title Activities have titles.

```
711 (*classXimera)
712 \let\title\relax
713 \newcommand{\title}[1][]{{\protected@xdef\@pretitle{#1}}\protected@xdef\@title}
715 \title{}
716
717 \newcounter{titlenumber}
718 \verb|\renewcommand{\thetitle

                     782 \renewcommand{\maketitle}{}
```

```
783 (/htXimera)
```

#### 2.5.6 Learning Outcomes

**\outcome** Specify a learning outcome, either at the level of a **problem** or an entire document in the preamble.

```
784 (*classXimera)
785 \def\theoutcomes{}
786
787 \ifdefined\HCode%
    \newcommand{\outcome}[1]{}
788
789 \ensuremath{\mbox{\sc lse}\%}
    \newwrite\outcomefile
790
    \immediate\openout\outcomefile=\jobname.oc
791
792
    794
    \immediate\write\outcomefile{\unexpanded{\outcome}{#1}}}
795
    \fi%
796 (/classXimera)
```

These can appear in either the preamble or in problem environments. with pdflatex, we produce the .oc file which includes ALL the outcomes; in the tex4ht world, we just produce spans for the specific outcomes.

#### 2.5.7 Labels and references

\label Labels and refs both generate anchors. A \label can be referenced from any file in the xourse.

\ref A \ref can connect one TEX file to another if they are in the same xourse.

```
812 \langle *htXimera \rangle
813 \renewcommand{\ref}[1]{\HCode{<a class="reference" href="\##1">#1</a>}}
814 \langle /htXimera \rangle
```

# 2.6 Images

#### 2.6.1 Images

image (env.) Place images inside an image environment. On paper, this centers the image. On the web, this provides additional benefits.

```
815 (*classXimera)
816 %\newenvironment{image}[1][]{\begin{center}}{\end{center}}
817 \NewEnviron{image}[1][3in]{%
818 \begin{center}\resizebox{#1}{!}{\BODY}\end{center}% resize and center
819 }
820 (/classXimera)
```

\alt Inside an image environment, \alt provides alt-text for assistive technology like screenreaders

```
821 \*classXimera\\
822 \newcommand{\alt}[1]{\}
823 \/classXimera\\
```

The image environment doesn't actually work in tex4ht as defined with NewEnviron; so this renewenvironment is needed. image-environment also gets formatted in a well, and when the user clicks on the image, it zooms in.

```
824 \*htXimera\\
825 \newcounter{imagealt}\
826 \setcounter{imagealt}{0}\
827 \renewenvironment{image}[1][]{\stepcounter{imagealt}\%\
828 \ifvmode \IgnorePar\fi \EndP\%\
829 \HCode{<div class="image-environment" role="img" aria-labelledby="image-alt-\arabic{imagealt}\%\
830 \}{\HCode{</div>}}\
831 \renewcommand{\alt}[1]{\HCode{<div style="display: none;" id="image-alt-\arabic{imagealt}\">}\
832 \/htXimera\\
833 \/htXimera\\
834 \/htXimera\\
835 \/htXimera\\
836 \/htXimera\\
837 \/htXimera\\
837 \/htXimera\\
838 \/htXimera\\
839 \/htXimera\\
830 \/htXimera\\
830 \/htXimera\\
830 \/htXimera\\
830 \/htXimera\\
831 \/enewcommand{\alt}\[1]{\htCode{<div style="display: none;" id="image-alt-\arabic{\imagealt}\">}\\\end{\althick}\[1] \(\frac{\imagealt}{\imagealt}\">}\\\\end{\althick}\[1] \(\frac{\imagealt}{\imagealt}\">}\\\\\end{\alpha}\]
```

Although we accept many formats, SVG is preferred on the web. Since we have a different mechanism for producing alt text, we want to ignore tex4ht's own method fo producing alt text.

```
833 (*cfgXimera)
834 \verb|\DeclareGraphicsExtensions{.jpg,.png,.gif,.svg}|
835 \Configure{graphics*}
836 {svg}{
      {\Configure{Needs}{File: \Gin@base.svg}\Needs{}}
837
      \Picture[]{\csname Gin@base\endcsname.svg \csname a:Gin-dim\endcsname}%
838
839 }
840 (/cfgXimera)
This is a hack to kill includegraphics commands in \documentclass{standalone}
files
841 (*cfgXimera)
842 \ifcsname ifstandalone\endcsname

```

#### 2.6.2 TikZ export

We generate SVGs and PNGs for any TikZ images, via the "externalize" feature of TikZ. Currently TikZ doesn't compile natively into the website because of how the xake bake compilation works. In order to make Tikz work, you need to get the tool mutool on the machine that is performing xake bake.

```

#### 2.12Select all

```
selectAll (env.) A multiple-multiple choice question
```

```
1191 (*classXimera)
1192 \newenvironment{selectAll}[1][]
1193 {\begin{trivlist}\item[\hskip \labelsep\small\bfseries Select All Correct Answers:]\hfil\begin{trivlist}
         {\end{enumerate}\end{trivlist}}
1195 (/classXimera)
```

In the future we need this to (optionally) be displayed in the problem, while the actual code lives in the solution. Here is how this could be implemented: Like the title/maketitle commands, the multiple-choice could be stored in \themultiplechoice, flip a boolean, and execute \makemultiplechoice at the \end of the problem. We should also make a command called \showchoices that will show choices in the handout.

On the web, selectAll is handled just like multipleChoice.

```
1196 (*htXimera)
1197 \renewenvironment{selectAll}{\refstepcounter{problem}}{}% \renewenvironment{selectAll}
1199 (/htXimera)

```

#### 2.12.2 Feedback

feedback (env.) An initially hidden environment that uncovers itself at an appropriate time. New Validator rewrite code added by Jason Nowell. Original code orovided by Jim Fowler Validator is an environment designed to run a custom check on answers (usually) using javascript code.

Define a placeholder command for validator and feedback.

```
\begin{array}{c} 1253 \ \langle *classXimera \rangle \\ 1254 \ \backslash PH@Command \} \end{array}
```

Validator should take an argument and detokenize it and display it at the start of the environment. The original Validator environment had everything framed in an mbox; presumably to make the text look a bit nicer, although this seems redundant with texttt. It shouldn't cause any harm so I have left it in for now.

```
1255 \newenvironment{validator}[1][]{  
1256 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to 1257 \mbox{\texttt{\detokenize}expandafter{\PH@Command}}}% Now expand PH@Command once and then def 1258 {}
```

First, if it's a handout, we want feedback to eat everything and then disappear entirely. So we do this:

```
1259 \ifhandout%
1260 \newenvironment{feedback}
1261 {%
```

If this isn't a handout, then we want to display the Feedback by using a label, positioned and formated as a \item in a trivlist. It is important that we also detokenize the content of the optional argument, as it is likely to contain javascript or other code that latex won't be able to make sense of.

```
won't be able to make sense of.
1267 \else
1268 \newenvironment{feedback}[1][attempt]{
1269
1270 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to
1271
1272 \begin{trivlist}% Begin the trivlist to use formating of the "Feedback" label.
1273 \item[\hskip \labelsep\small\slshape\bfseries Feedback% Format the "Feedback" label. Don't fo
1274 (\texttt{\detokenize\expandafter{\PH@Command}}): % Format (and detokenize) the condition for
1275 \hspace{2ex}]\small\slshape% Insert some space before the actual feedback given.
1277 \end{trivlist}
1278 }
1279
1280 \fi
1281 (/classXimera)
Feedback environments take an optional parameter (which describes when the feedback
is to be provided)
1282 (*htXimera)
1283 \def\feedback{\@ifnextchar[{\@feedbackcode}{\@feedbackattempt}}
1284 \def\@feedbackattempt{\@feedbackcode[attempt]}
1285 \def\@feedbackcode[#1]{\stepcounter{identification}%

1289 {\HCode{<div class="feedback" data-feedback="script" id="feedback\arabic{identification}"><script" id="feedback\arabic{identification}"><script id="feedback\arabic{identificati
1290 \def\endfeedback{\HCode{</div>}\IgnoreIndent}
1291 (/htXimera)
```

# 2.12.3 Ungraded activities

ungraded (env.) The ungraded environment is used to record that certain parts of activities should not be worth points. For example, if you want to use a multipleChoice as a survey question, you can place it inside an ungraded environment. On the IATEX side, the ungraded environment does nothing.

```
1292 {\text{classXimera}}
1293 {\text{newenvironment{ungraded}{}}}
1294 {\text{classXimera}}
```

But on the html side, ungraded wraps the activities in a div in order to assign some weight to them for grading.

```
1295 \*htXimera\)
1296 \renewenvironment{ungraded}{%
1297 \ifvmode \IgnorePar\fi \EndP\HCode{<div class="ungraded">}\IgnoreIndent%
1298 \{
1299 \ifvmode \IgnorePar\fi \EndP\HCode{</div>}\IgnoreIndent%
1300 \}
1301 \( /htXimera\)
```

## 2.13 Support for the web

#### 2.13.1 MathJax support

When using mathjax, dump all the \newcommands to a .jax file.

```
First, create the .jax file.
1302 (*classXimera)
1303 \ifdefined\HCode
1304
                  \else
1305
                             \newwrite\myfile
                              \immediate\openout\myfile=\jobname.jax
1306
1307 \fi
1308 (/classXimera)
From only.dtx we must also create prompt on the MathJax side.
1309 (*classXimera)
1310 \fi
1311 \else
1312
                              \immediate\write\myfile{\unexpanded{\newenvironment}{prompt}{}}}
1313 \fi
1314 (/classXimera)
Redefine newcommand appropriately.
1315 (*classXimera)
1317 \else
1318 \let\@oldargdef\@argdef
1319 \long\def\@argdef#1[#2]#3{%
1321 \@oldargdef#1[#2]{#3}%
1322 }
1323
1324 \let\@OldDeclareMathOperator\DeclareMathOperator
1325 \ \texttt{\partial} \ \texttt{\part
1326
1327 \fi
1328 (/classXimera)
Include the jax'ed newcommands
1329 (*cfgXimera)
1330 % Remove commands that use @
1331 \immediate\write18{sed -i "/@/d" \jobname.jax}
1332 % Replace ##1 with #1 and so forth
1333 \immediate\write18{sed -i "s/\string#\string\\([0-9]\string\\)/\string#\string\\1/g"
1335 \Configure{BVerbatimInput}{}{}{}
1336
1337 \Configure{verbatiminput}{}{}{}{}
1338
1339 \% Instead of a nonbreaking space, use a standard space
1340 \makeatletter
1341 \def\FV@Space{\space}
1342 \makeatother
1344 % Include the mathjax newcommands in a math/tex script right at the beginning of the body
1345 \Configure{BODY}{%
1346 \HCode{<body>\Hnewline}%
1347 \Tg<div class="preamble">%
1348 \Tg<script type="math/tex">%
1349 \BVerbatimInput{\jobname.jax}%
1350 Tg</script>%
1351 \verb|\frieExists{\jobname.ids}{\label{code} type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascript">\label{type="text/javascr
1352 \BVerbatimInput{\jobname.ids}%
1353 \HCode{</script>\Hnewline}%
1354 \Tg</div>%
1355 }{}
1357 \HCode{</body>\Hnewline}%
1358 }
```

Now I just need to add a newcommand command which outputs the appropriate new-commands to MathJax; then this should be "good enough" for our purposes.

```
1359 \newtoks\eqtoks
                 1360 \def\AltMath#1${\eqtoks{#1}}%
                                           \HCode{<script type="math/tex">\the\eqtoks</script>}$}

#### 2.14 Tools

## 2.14.1 Suppress

suppress (env.) The suppress environment is a good way to suppress output without commenting it. This

way we can avoid many of the places we use environ package and this should also avoid most of the verbatim conflicts. This is code adapted from syntonly.sty.

```
1401 (*classXimera)
1402 \font\dummyft@=dummy \relax
1403 \ensuremath{\mbox{\sc loss}}\
1404
      \begingroup\par
      \parskip\z@
1405
      \offinterlineskip
1406
1407
      \baselineskip=\z@skip
1408
      \lineskip=\z@skip
1409
      \lineskiplimit=\maxdimen
1410
      \dummyft@
1411
      \count@\sixt@@n
1412
      \loop\ifnum\count@ >\z@
1413
        \advance\count@\m@ne
        \textfont\count@\dummyft@
1414
        \scriptfont\count@\dummyft@
1415
        \scriptscriptfont\count@\dummyft@
1416
1417
      \repeat
1418
      \let\selectfont\relax
      \let\mathversion\@gobble
1419
      \let\getanddefine@fonts\@gobbletwo
1420
      \tracinglostchars\z0
1421
1422
      \frenchspacing
1423
      \hbadness\@M}
1424 \endsuppress{\par\endgroup}
1425 \langle \text{/classXimera} \rangle
```

#### 2.14.2 The End

It seems that some of the files need to conclude with something or another.

```
1426 (*htXimera)
1427 \Hinput{ximera}
1428 (/htXimera)
1429 (*htXourse)
1430 \Hinput{xourse}
1431 (/htXourse)
1432 (*cfgXimera)
1433 \begin{document}
1434 \EndPreamble
1435 (/cfgXimera)
```

# 3 xourse.cls

```
1436 \langle *classXourse \rangle
```

notoc The default behavior of the class is to provide a table of contents listing all activities in the course. This option will supress this table of contents.

```
1437 \newif\ifnotoc
1438 \notocfalse
1439 \DeclareOption{notoc}{\notoctrue}
```

nonewpage The default behavior of the class is to start each activity on a new page. This option will start activities without making a new page.

```
1440 \newif\ifnonewpage
1441 \nonewpagefalse
1442 \DeclareOption{nonewpage}{\nonewpagetrue}

1443 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{ximera}}

1444 \ProcessOptions\relax

1445 \LoadClass{ximera}

1446 % \begin{macrocode}

1447 \/classXourse\
```

#### 3.1 Activities

The core of the xourse system. It works by redefining the document environment, thus making the \begin and \end{document} of the subfile 'transparent' to the inclusion. The redefinition of \documentclass is analogous, just having a required and an optional arguments which mean nothing to \subfile.

```
1448 \enskip@preamble} \fill 1449 \enskip@preamble} \fill 1450 \enskip@p
```

Note that the new command \subfile calls for \skip@preamble within a group. The changes to document and \documentclass are undone after the inclusion of the subfile.

Numbering starts a page too soon without this:

```
1453 \ \text{let}\ \text{input}
```

Store usual \maketitle as \othermaketitle

1454 \let\othermaketitle\maketitle

\maketitle In a xourse file, \maketitle is redefined to give course packet title page and toc.

```
1455 \renewcommand{\maketitle}{ %
1456 \pagestyle{empty}
1457 \begin{center}
1458 ~\\ %puts space at top of page to move title down.
1459 \vskip .25\textheight
1460 \hrulefill\\
1461 \vskip 1em
1462 \bfseries{\Huge \@title} \\
1463 \hrulefill\\
1464 \vskip 3em
1465 {\Large \@author}
1466 \vskip 2em
1467 {\large \@date}
1468 \end{center}
1469 \clearpage
```

When notoc option is used, we do not include a table of contents. Otherwise we include a table of contents in every course packet.

```
1470 \ifnotoc
1471 \else
1472 \tableofcontents\clearpage
1473 \clearpage
1474 \fi
```

Switch to main pagestyle, just like a document with document class ximera.

```
1475 \pagestyle{main}
```

Renew maketitle to usual definition.

And we finish with our redefinition of \maketitle.

```
1477 }
1478 \relax
1479 \/classXourse
```

# 3.1.1 Regular activities

\activity Documents included with \activity will be included in the body of the xourse document. Any \input commands within included ximera documents will be ignored. Any \usepackage commands within included ximera documents will cause an error. Overlapping \newcommand definitions within multiple ximera documents included simultaneously will cause an error. The \activity command inputs the file name provided without \documentclass, without \begin{document}/\end{document} and without any inputs in the preamble of the included file.

```
1480 (*classXourse)
          1481 \ifnonewpage
          1482 \newcommand{\activity}[2][]{%
          1483 \setkeys{activity}{#1}
                 \renewcommand{\input}[1]{}

          1520 \relax
          1521 (/classXourse)
              The practice environment does nothing, but will eventually produce exercises at the
          end of an activity
          1522 (*classXourse)
          1523 \ifxake
          1524 \renewcommand\practice[2][]{}
          1525 \fi
          1526 (/classXourse)
              I suppose it is reasonable for practice cards to NOT have an activity tyle, since the
          activitystyle is basically PRACTICE.
          1527 (*htXourse)
          1528 \renewcommand\practice[2][]{%
                 \ifvmode\IgnorePar\fi\EndP%
                 \HCode{<a class="activity card practice" href="#2" data-options="#1">#2</a>}%
          1530
          1531
                 \IgnoreIndent%
```

```
1532 }
1533 (/htXourse)
```

#### 3.2 Sectioning

```
Makes the table of contents look a bit better. This can be redefined in the preamble if
\section you do not like the appearance. The name of a section inside an activity.
```

```
1534 (*classXourse)
              1535 \renewcommand*\l@section{\@dottedtocline{1}\{1.5em\}\{4.2em\}}
              1536 (/classXourse)
  \subsection The name of a subsection inside an activity.
              1537 (*classXourse)
              1538 \verb|\renewcommand*| 10subsection{\cdottedtocline{2}{3.8em}{4.2em}} \\
              1539 (/classXourse)
        \part Xourse files can have parts. The name of a large part of a xourse.
              1540 (*htXourse)
              1541 \newcounter{ximera@part}
              1542 \setcounter{ximera@part}{0}
              1543 \renewcommand\part[1]{%
              1544 \stepcounter{ximera@part}%
              1545 \ifvmode \IgnorePar\fi \EndP%
              1546 %\HCode{<h1 id="part\arabic{ximera@part}" class="card part">}#1\HCode{</h1>}% makes cards dis
              1547 \HCode{<h1 id="part\arabic{ximera@part}" class="card part">#1</h1>}%
              1548 \IgnoreIndent%
              1549 }
              1550 (/htXourse)
   \paragraph Paragraph commands emit spans. A small heading.
              1551 (*cfgXimera)
              1552 \renewcommand{\paragraph}[1]{%
              1553
                     \HCode{<span class="paragraphHead">}%
              1554
              1555
                     \HCode{</span>}\par\IgnorePar}
              1556 (/cfgXimera)
\subparagraph An even smaller heading.
              1557 (*cfgXimera)
              1558 \renewcommand{\subparagraph}[1]{%
                     \HCode{<span class="subparagraphHead">}%
              1559
              1560
```

#### Grading by points 3.3

1561

1562 (/cfgXimera)

graded (env.) The graded environment does nothing in latex, but in html, it wraps the activities in a div in order to assign some weight to them for grading.

```
1563 (*classXourse)
1564 \newenvironment{graded}[1]{}{}
1565 (/classXourse)
```

\HCode{</span>}\par\IgnorePar}

So indeed this environment in html wraps the activities in a div in order to assign some number of points to them.

```
1566 (*htXourse)
1567 \renewenvironment{graded}[1]{%
1568 \ifvmode \IgnorePar\fi \EndP\HCode{<div class="graded" data-weight="#1">}\IgnoreIndent%
1570 \ifvmode \IgnorePar\fi \EndP\HCode{</div>}\IgnoreIndent%
1572 (/htXourse)
```

# 3.4 Logos

```
\logo A logo for the xourse.
      1573 (*classXourse)
      1574 \verb|\newcommand*{\logo}[1]{%}
            \ifx\@onlypreamble\@notprerr
      1575
              \ClassError{xourse}{logo can only be used in the preamble}
      1576
      1577
                 {Move your logo command to the preamble}
      1578
            \else %
              \IfFileExists{#1}%
      1579
                 {\gdef\xourse@logo{#1}}%
      1580
                 {\ClassError{xourse}{logo file does not exist}
      1581
      1582
                   {To use logo, make sure that the referenced image file exists}}\%
            \pi\%
      1583
      1584 }
      1585
      1586 (/classXourse)
         The xourse logo is an og:image in the opengraph taxonomy.
      1587 (*htXourse)
      1588 \Configure{@HEAD}{%
      1589 \HCode{<meta name="og:image" content="}%
      1590 \ifdefined\xourse@logo%
      1591 \xourse@logo%
      1592 \fi%
      1593 \HCode{" />\Hnewline}}%
      1594 (/htXourse)
```
