ximera — Simultaneously write print and online interactive materials.*

Jim Fowler — Jeramiah Hocutt — Oscar Levin — Jason Nowell — Hans Parshall — Bart Snapp

Released 2018/10/28

Abstract

"Ximera begins where TEX ends." The ximera class aids in the creation of handouts, worksheets, exercises, and sections of textbooks to be used either individually or "glued" together via a xourse file. All ximera documents can be deployed in an online interactive form via xake See: Ximera Project and the source code on GitHub.

1 Introduction

Ximera, pronounced "chimera," (Ximera: Interactive, Mathematics, EResources, for All) is an open-source platform that provides tools for authoring and publishing (PDF and Online), open-source, interactive educational content, such as textbooks, assessments, and online courses. The Ximera document class provides the following features:

Formatting for different domains The Ximera document class provides built-in support for formatting documents in both PDF and online formats, which can be a big time-saver for authors. Additionally, it allows for the simultaneous creation of solution manuals and teaching editions, which can be especially useful for educators

Compiling individually or as a whole With the Ximera document class, authors can easily compile individual documents or an entire collection of documents. This flexibility can be helpful when making changes to specific documents without having to re-compile the entire collection. Moreover, this allows an author to share large portions of a text with another, with minimal changes.

Interactive content The Ximera document class allows for the inclusion of interactive content, such as answer boxes that are validated by a client-side computer algebra system. Additionally, it allows for the embedding of YouTube videos, Desmos graphs, and GeoGebra interactives.

All content displayed By default, the Ximera document class displays all content to the author. This means the author see what the students see, along with answers and solutions, and links (that can be checked) to various interactive elements (when deployed, the interactive elements are truly embedded). This can be especially helpful for catching errors or inconsistencies in the content.

2 ximera.cls

2.1 Options for the class

We start by listing the options for the ximera document class. Note, since the xourse class is based on the ximera class, all listed options are available there too.

1 (*classXimera)

^{*}This file describes version v1.0, last revised 2018/10/28.

- handout The default behavior of the class is to display all content. This means that if any questions are asked, all answers are shown. Moreover, some content will only have a meaningful presentation when displayed online. When compiled without any options, this content will be shown too. This option will supress such content and generate a reasonable printiable "handout."
 - 2 \newif\ifhandout
 - 3 \handoutfalse
 - 4 \DeclareOption{handout}{\handouttrue}
- noauthor By default, authors are listed at the bottom of the first page of a document. This option will supress the listing of the authors.
 - 5 \newif\ifnoauthor
 - 6 \noauthorfalse
 - 7 \DeclareOption{noauthor}{\noauthortrue}
- nooutcomes By default, learning outcomes are listed at the bottom of the first page of a document. This option will supress the listing of the learning outcomes.
 - $8 \neq 8$
 - 9 \nooutcomesfalse
 - 10 \DeclareOption{nooutcomes}{\nooutcomestrue}
- instructornotes This option will turn on (and off) notes written for the instructor.
 - 11 \newif\ifinstructornotes
 - 12 \instructornotesfalse
 - 13 \DeclareOption{instructornotes}{\instructornotestrue}

noinstructornotes This option will turn off (and on) notes written for the instructor.

14 \DeclareOption{noinstructornotes}{\instructornotestrue}

hints When the handout options is used, hints are not shown. This option will make hints visible in handout mode.

- 15 \newif\ifhints
- 16 \hintsfalse
- 17 \DeclareOption{hints}{\hintstrue}
- newpage This option will start each problem-like environment (exercise, question, problem, and exploration) start on a new page.
 - 18 \newif\ifnewpage
 - 19 \newpagefalse
 - 20 \DeclareOption{newpage}{\newpagetrue}
- numbers This option will number the titles of the activity. By default the activities are unnumbered.
 - 21 \newif\ifnumbers
 - $22 \setminus numbersfalse$
 - 23 \DeclareOption{numbers}{\numberstrue}
- wordchoicegiven This option will replace the choices shown by wordChoice with the correct choice. No indication of the wordChoice environment will be shown.
 - 24 \newif\ifwordchoicegiven
 - $25\ \mbox{\wordchoicegivenfalse}$

 - $27\mbox{\ensuremath{\mbox{\sc Nupport}}}$ for other wordchoice command contents.
 - 28 \firstinlinechoicetrue
 - 29
 - $30 \neq 30$
 - 31 \xakefalse
 - 32 \DeclareOption{xake}{\xaketrue}
 - 33
 - $34 \neq 34$
 - $35 \setminus tikzexportfalse$

```
36 \DeclareOption{tikzexport}{%

```

2.2 Loading packages

Since we want \cancel to work, we load it here to avoid polluting the .jax output.

```
63 \RequirePackage[makeroom] {cancel}
```

64 \RequirePackage[inline] {enumitem}

Quite a few packages are required by the document class. This is a list of required packages. As packages are added to this list, we should include a comment as to where they are being utilized. This will help keep this list from being redundant and/or outdated.

```
65 \RequirePackage[pagestyles]{titlesec}
66 \RequirePackage{titletoc}
67 \RequirePackage{titling}
68 \RequirePackage{url}
69 \RequirePackage[table]{xcolor}
70 \RequirePackage{tikz}
71 \RequirePackage{pgfplots}
72 \usepgfplotslibrary{groupplots}
73 \usetikzlibrary{calc}
74 \RequirePackage{fancyvrb}

Load forloop for the problem environment dynamic naming and building.
75 \RequirePackage{forloop}

Now we load even more packages.
```

```
76 \RequirePackage{environ}% Included to allow saving of environment contents. This does *not* ]
77 \RequirePackage{amssymb}% Included to have access to math typeset.
78 \RequirePackage{amsmath}% Included to have access to math typeset.
79 \RequirePackage{amsthm}% Included to have access to math typeset.
80 \RequirePackage{xifthen}% http://ctan.org/pkg/xifthen
81 \RequirePackage{multido}% http://ctan.org/pkg/multido
82 \RequirePackage{listings} %% is this required???
83
84 \RequirePackage{xkeyval}
85
86 \RequirePackage{comment}
87 \/classXimera\
```

```
Various packages must be loaded early to avoid polluting the .jax file.
 88 (*classXimera)
 89 \RequirePackage{gettitlestring}
 90 \ \texttt{\ensuremath{\mbox{RequirePackage}\{nameref\}}}
 91 \RequirePackage{epstopdf}
 92 (/classXimera)
2.3
      Page setup
We want non-indented spaced-out paragraphs.
 93 (*classXimera)
 94 \setlength{\parindent}{0pt}
 95 \setlength{\parskip}{5pt}
 96 (/classXimera)
To avoid weird margins in 2-sided mode, change the margins.
 97 (*classXimera)
 98 \oddsidemargin 62pt
 99 \evensidemargin 62pt
 100 \textwidth 345pt
101 \headheight 14pt
 102 (/classXimera)
On the HTML side, there is more complicated page setup to perform.

                                                  Metadata
```

To encourage authors to include relevant parseable metadata in the preamble, we define some currently ignored commands.

680 \newcommand{\license}{\excludecomment} 681 \/classXimera\/

\acknowledgement

In the preamble, use **\acknowledgement** to credit others who contributed to the intellectual content beside the author.

```
682 (*classXimera)
683 \newcommand{\acknowledgement}{\excludecomment}
684 (/classXimera)
```

\tag In the preamble, a \tag provides a free-form taxonomy.

685 (*classXimera)

```
686 \renewcommand{\tag}{\excludecomment}
687 \( / \classXimera \rangle \)
On the HTML side, we mark the file as the appropriate kind of object—either activity or xourse.
688 \( * \text{htXourse} \rangle \)
689 \( \text{Mark this as a xourse file} \)
690 \( \text{Configure} \( \text{QHEAD} \) \( \text{HCode} \) \( \text{Mare an mae} = "description" content = "xourse" /> \text{Hnewline} \)
691 \( \rangle \)
```

2.5.2 Abstract

abstract (env.) Every activity should include a short abstract.

```
692 (*classXimera)
693 \let\abstract\relax
694 \let\endabstract\relax
695 % Use of environ package, may want to find a better way.
696 \NewEnviron{abstract}{\protected@xdef\theabstract{\BODY}}}
697 (/classXimera)
```

The abstract has been stored in \theabstract and should be emitted as a div, but confusingly I guess <div class="abstract"> is defined somewhere deeper inside tex4ht, so the code below is probably unnecessary.

2.5.3 Titles and authors

2.5.4 Authors

\author Activities have authors. Warn the user if no author is provided.

```
698 (*classXimera)
699 \let\@emptyauthor\@author
700 \def\author#1{\gdef\@author{#1}}
701 \def\@author{\@latex@warning@no@line{No \noexpand\author given}}
702 (/classXimera)
Include author name in meta tags
703 (*htXimera)
704 \Configure{@HEAD}{\HCode{<meta name="author" content="}\@author\HCode{" />\Hnewline}}
705 (/htXimera)
```

The \and command would emit tabular environments which really should not appear in a meta tag.

706 (htXimera | classXimera)\def\and{and }

2.5.5 Title

\title Activities have titles.

```
707 (*classXimera)
708 \let\title\relax
709 \newcommand{\title}[1][]{{\protected@xdef\@pretitle{#1}}\protected@xdef\@title}
710
711 \title{}
712

2.6.2 TikZ export

820 (*htXimera)

We generate SVGs and PNGs for any TikZ images, via the "externalize" feature of TikZ. Currently TikZ doesn't compile natively into the website because of how the xake bake compilation works. In order to make Tikz work, you need to get the tool mutool on the machine that is performing xake bake.

```

1189 \newenvironment{selectAll}[1][]
1190 {\begin{trivlist}\item[\hskip \labelsep\small\bfseries Select All Correct Answers:]\hfil\begin{191 {\end{enumerate}\end{trivlist}}
```

In the future we need this to (optionally) be displayed in the problem, while the actual code lives in the solution. Here is how this could be implemented: Like the title/maketitle commands, the multiple-choice could be stored in \themultiplechoice, flip a boolean, and execute \makemultiplechoice at the \end of the problem. We should also make a command called \showchoices that will show choices in the handout.

On the web, selectAll is handled just like multipleChoice.

1198 \newboolean{given} %% required for freeResponse

```

2.12.2 Feedback

feedback (env.) An initially hidden environment that uncovers itself at an appropriate time. New Validator rewrite code added by Jason Nowell. Original code orovided by Jim Fowler Validator is an environment designed to run a custom check on answers (usually) using javascript code.

Define a placeholder command for validator and feedback.

```
1250 (*classXimera)
1251 \newcommand{\PH@Command}{}
```

Validator should take an argument and detokenize it and display it at the start of the environment. The original Validator environment had everything framed in an mbox; presumably to make the text look a bit nicer, although this seems redundant with texttt. It shouldn't cause any harm so I have left it in for now.

```
1252 \newenvironment{validator}[1][]{
```

1253 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to 1254 \mbox{\texttt{\detokenize\expandafter{\PH@Command}}}% Now expand PH@Command once and then de 1255 }{}

First, if it's a handout, we want feedback to eat everything and then disappear entirely. So we do this:

If this isn't a handout, then we want to display the Feedback by using a label, positioned and formated as a \item in a trivlist. It is important that we also detokenize the content of the optional argument, as it is likely to contain javascript or other code that latex won't be able to make sense of.

```
1264 \else

1265 \newenvironment{feedback}[1][attempt]{
1266
1267 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to 1268
1269 \begin{trivlist}% Begin the trivlist to use formating of the "Feedback" label.
```

1270 \item[\hskip \labelsep\small\slshape\bfseries Feedback% Format the "Feedback" label. Don't fo

1271 (\texttt{\detokenize\expandafter{\PH@Command}}):% Format (and detokenize) the condition for : 1272 \hspace{2ex}]\small\slshape% Insert some space before the actual feedback given.

```
1273 }{
1274 \end{trivlist}
1275 }
1276
1277 \fi
1278 (/classXimera)
Feedback environments take an optional parameter (which describes when the feedback
is to be provided)
1279 (*htXimera)
1280 \end{\code} {\tt \code} {\tt \cod
1281 \def\@feedbackattempt{\@feedbackcode[attempt]}
1282 \def\@feedbackcode[#1]{\stepcounter{identification}%
1283 \ifvmode \IgnorePar\fi \EndP%
1284 \ \texttt{\def} \ \texttt{\def}

1287 \def\endfeedback{\HCode{</div>}\IgnoreIndent}
1288 (/htXimera)
```

2.12.3 Ungraded activities

ungraded (env.) The ungraded environment is used to record that certain parts of activities should not be worth points. For example, if you want to use a multipleChoice as a survey question, you can place it inside an ungraded environment. On the LATEX side, the ungraded environment does nothing.

```
1289 (*classXimera)
1290 \newenvironment{ungraded}{}{}
1291 (/classXimera)
```

But on the html side, ungraded wraps the activities in a div in order to assign some weight to them for grading.

```
1292 \*htXimera\\
1293 \renewenvironment{ungraded}{%\}
1294 \ifvmode \IgnorePar\fi \EndP\\Code{\div}\IgnoreIndent%\}
1295 \}{\}
1296 \ifvmode \IgnorePar\fi \EndP\\Code{\div}\IgnoreIndent%\}
1297 \}
1298 \( /htXimera \)
```

2.13 Support for the web

2.13.1 MathJax support

```
When using mathjax, dump all the \newcommands to a .jax file.
```

```
First, create the .jax file.
```

1299 (*classXimera)

```
1300 \ifdefined\HCode
1301
    \else
1302
        \newwrite\myfile
1303
        \immediate\openout\myfile=\jobname.jax
1304 \fi
1305 (/classXimera)
From only.dtx we must also create prompt on the MathJax side.
1306 (*classXimera)
1307 \fi
     \else
1309
        \immediate\write\myfile{\unexpanded{\newenvironment}{prompt}{}}}
1310 \fi
1311 (/classXimera)
Redefine newcommand appropriately.
1312 (*classXimera)
```

```
1313 \ifdefined\HCode
          \else
1315 \let\@oldargdef\@argdef
1316 \long\def\@argdef#1[#2]#3{%
\label{lem:limited} 1317 \end{\text{\newcommand}} {\newcommand} {\newcomma
1318 \@oldargdef#1[#2]{#3}%
1319 }
1320
1321 \let\@OldDeclareMathOperator\DeclareMathOperator
1322 \renewcommand{\DeclareMathOperator}[2] {\@OldDeclareMathOperator{#1}{#2}\immediate\write\myfi
1324 \fi
1325 (/classXimera)
Include the jax'ed newcommands
1326 (*cfgXimera)
1327 \% Remove commands that use @
1328 \immediate\write18{sed -i "/0/d" \jobname.jax}
1329 % Replace ##1 with #1 and so forth
1330 \immediate\write18{sed -i "s/\string#\string\\([0-9]\string\\)/\string#\string\\1/g"
1332 \Configure{BVerbatimInput}{}{}{}{}
1333
1334 \Configure{verbatiminput}{}{}{}{}
1335
1336 % Instead of a nonbreaking space, use a standard space
1337 \makeatletter
1338 \def\FV@Space{\space}
1339 \makeatother
1340
1341 % Include the mathjax newcommands in a math/tex script right at the beginning of the body
1342 \Configure{BODY}{%
1343 \HCode{<body>\Hnewline}%
1344 \Tg<div class="preamble">%
1345 \Tg<script type="math/tex">%
1346 \BVerbatimInput{\jobname.jax}%
1347 \Tg</script>%
1348 \IfFileExists{\jobname.ids}{\HCode{<script type="text/javascript">\Hnewline}%

1442 \LoadClass{ximera}

1443 % \begin{macrocode}

1444 \(/classXourse\)
```

3.1 Activities

The core of the xourse system. It works by redefining the document environment, thus making the \begin and \end{document} of the subfile 'transparent' to the inclusion. The redefinition of \documentclass is analogous, just having a required and an optional arguments which mean nothing to \subfile.

```
1445 \*classXourse\\
1446 \newcommand{\skip@preamble}{\%}
1447 \let\document\relax\let\enddocument\relax\%
1448 \newenvironment{\document}{\let\input\otherinput}{\}\%
1449 \renewcommand{\documentclass}[2][subfiles]{\}\}
```

Note that the new command \subfile calls for \skip@preamble within a group. The changes to document and \documentclass are undone after the inclusion of the subfile.

Numbering starts a page too soon without this:

```
1450 \ \text{let}\ \text{input}
```

```
Store usual \maketitle as \othermaketitle
           1451 \let\othermaketitle\maketitle
\maketitle In a xourse file, \maketitle is redefined to give course packet title page and toc.
           1452 \renewcommand{\maketitle}{ %
           1453 \pagestyle{empty}
           1454 \begin{center}
           1455 ~\\ %puts space at top of page to move title down.
           1456 \vskip .25\textheight
           1457 \hrulefill\\
           1458 \vskip 1em
           1459 \ \text{Muge } \ \
           1460 \hrulefill\\
           1461 \vskip 3em
           1462 {\Large \@author}
           1463 \vskip 2em
           1464 {\large \@date}
           1465 \end{center}
           1466 \clearpage
           When notoc option is used, we do not include a table of contents. Otherwise we include
           a table of contents in every course packet.
           1467 \ifnotoc
           1468 \else
                 \tableofcontents\clearpage
                 \clearpage
           1471 \fi
           Switch to main pagestyle, just like a document with document class ximera.
           1472 \pagestyle{main}
           Renew maketitle to usual definition.
           1473 \let\maketitle\othermaketitle
           And we finish with our redefinition of \maketitle.
           1474 }
           1475 \relax
           1476 (/classXourse)
```

3.1.1 Regular activities

\activity Documents included with \activity will be included in the body of the xourse document. Any \input commands within included ximera documents will be ignored. Any \usepackage commands within included ximera documents will cause an error. Overlapping \newcommand definitions within multiple ximera documents included simultaneously will cause an error. The \activity command inputs the file name provided without \documentclass, without \begin{document}/\end{document} and without any inputs in the preamble of the included file.

```

                    Grading by points
 graded (env.) The graded environment does nothing in latex, but in html, it wraps the activities in a
              div in order to assign some weight to them for grading.
              1560 (*classXourse)
              1561 \newenvironment{graded}[1]{}{}
              1562 (/classXourse)
              So indeed this environment in html wraps the activities in a div in order to assign some
              number of points to them.
              1563 (*htXourse)
              1564 \renewenvironment{graded}[1]{%
              1565 \ifvmode \IgnorePar\fi \EndP\HCode{<div class="graded" data-weight="#1">}\IgnoreIndent%
              1567 \ifvmode \IgnorePar\fi \EndP\HCode{</div>}\IgnoreIndent%
              1568 }
              1569 (/htXourse)
              3.4
                    Logos
        \logo A logo for the xourse.
              1570 (*classXourse)
              1571 \newcommand*{\logo}[1]{%
                    \ifx\@onlypreamble\@notprerr
