ximera — Simultaneously write print and online interactive materials.*

Jim Fowler Jeramiah Hocutt Oscar Levin Jason Nowell Wim Obbels Hans Parshall Bart Snapp

Released 2024/05/12

Abstract

"Ximera begins where TEX ends." The ximera class aids in the creation of handouts, worksheets, exercises, and sections of textbooks to be used either individually or "glued" together via a xourse file. All ximera documents can be deployed in an online interactive form via xake See: Ximera Project and the source code on GitHub.

1 Introduction

Ximera, pronounced "chimera," (Ximera: Interactive, Mathematics, EResources, for All) is an open-source platform that provides tools for authoring and publishing (PDF and Online), open-source, interactive educational content, such as textbooks, assessments, and online courses. The Ximera document class provides the following features:

Formatting for different domains The Ximera document class provides built-in support for formatting documents in both PDF and online formats, which can be a big time-saver for authors. Additionally, it allows for the simultaneous creation of solution manuals and teaching editions, which can be especially useful for educators.

Compiling individually or as a whole With the Ximera document class, authors can easily compile individual documents or an entire collection of documents. This flexibility can be helpful when making changes to specific documents without having to re-compile the entire collection. Moreover, this allows an author to share large portions of a text with another, with minimal changes.

Interactive content The Ximera document class allows for the inclusion of interactive content, such as answer boxes that are validated by a client-side computer algebra system. Additionally, it allows for the embedding of YouTube videos, Desmos graphs, and GeoGebra interactives.

All content displayed By default, the Ximera document class displays all content to the author. This means the author see what the students see, along with answers and solutions, and links (that can be checked) to various interactive elements (when deployed, the interactive elements are truly embedded). This can be especially helpful for catching errors or inconsistencies in the content.

Online examples can be found at

https://go.osu.edu/ximera-examples

^{*}This file describes version v1.5.1, last revised 2024/05/12.

2 ximera.cls

2.1 Options for the class

We start by listing the options for the ximera document class. Note, since the xourse class is based on the ximera class, all listed options are available there too.

- 1 (*classXimera)
- handout The default behavior of the class is to display all content. This means that if any questions are asked, all answers are shown. Moreover, some content will only have a meaningful presentation when displayed online. When compiled without any options, this content will be shown too. This option will supress such content and generate a reasonable printiable "handout."
 - 2 \newif\ifhandout
 - 3 \handoutfalse
 - 4 \DeclareOption{handout}{\handouttrue}
- noauthor By default, authors are listed at the bottom of the first page of a document. This option will supress the listing of the authors.
 - 5 \newif\ifnoauthor
 - $6 \setminus noauthorfalse$
 - 7 \DeclareOption{noauthor}{\noauthortrue}
- nooutcomes By default, learning outcomes are listed at the bottom of the first page of a document. This option will supress the listing of the learning outcomes.
 - 8 \newif\ifnooutcomes
 - 9 \nooutcomesfalse
 - 10 \DeclareOption{nooutcomes}{\nooutcomestrue}

instructornotes This option will turn on (and off) notes written for the instructor.

- 11 \newif\ifinstructornotes
- 12 \instructornotesfalse

noinstructornotes This option will turn off (and on) notes written for the instructor.

- hints When the handout options is used, hints are not shown. This option will make hints visible in handout mode.
 - 15 \newif\ifhints
 - 16 \hintsfalse
 - 17 \DeclareOption{hints}{\hintstrue}
- newpage This option will start each problem-like environment (exercise, question, problem, and exploration) start on a new page.
 - 18 \newif\ifnewpage
 - $19 \newpagefalse$
 - 20 \DeclareOption{newpage}{\newpagetrue}
- numbers This option will number the titles of the activity. By default the activities are unnumbered
 - 21 \newif\ifnumbers
 - $22 \setminus numbersfalse$
 - 23 \DeclareOption{numbers}{\numberstrue}
- wordchoicegiven This option will replace the choices shown by wordChoice with the correct choice. No indication of the wordChoice environment will be shown.
 - 24 \newif\ifwordchoicegiven
 - 25 \wordchoicegivenfalse
 - 26 \DeclareOption{wordchoicegiven}{\wordchoicegiventrue}
 - 27 \newif\iffirstinlinechoice% Support for other wordchoice command contents.
 - 28 \firstinlinechoicetrue

2.2 Loading packages

Since we want \cancel to work, we load it here to avoid polluting the .jax output.

```
63 \RequirePackage[makeroom]{cancel}
```

Quite a few packages are required by the document class. This is a list of required packages. As packages are added to this list, we should include a comment as to where they are being utilized. This will help keep this list from being redundant and/or outdated.

```
64 \RequirePackage[inline] {enumitem}
65 \RequirePackage[pagestyles] {titlesec}
66 \RequirePackage{titletoc}
67 \RequirePackage{titling}
68 \RequirePackage{url}
69 \RequirePackage[table] {xcolor}
70 \RequirePackage{tikz}
71 \RequirePackage{pfplots}
72 \usepfplotslibrary{groupplots}
73 \usetikzlibrary{calc}
74 \RequirePackage{fancyvrb}
```

Load forloop for the problem environment dynamic naming and building.

```
75 \RequirePackage{forloop}
```

Now we load even more packages.

```
76 \RequirePackage{environ}% Included to allow saving of environment contents. This does *not* properties of the package and t
```

```
81 \RequirePackage{multido}% http://ctan.org/pkg/multido
   82 \RequirePackage{listings} %% is this required???
   84 \RequirePackage{xkeyval}
   86 \RequirePackage{comment}
   87 (/classXimera)
Various packages must be loaded early to avoid polluting the .jax file.
   88 (*classXimera)
   89 \RequirePackage{gettitlestring}
   90 \RequirePackage{nameref}
   91 \RequirePackage{epstopdf}
   92 (/classXimera)

           413 (/htXimera)
           2.4.6 Hints
hint (env.) Hint environments can be embedded inside problems.
           414 (*classXimera)
           Create a counter that will track how deeply nested the current hint is
           415 \newcounter{hintLevel}
           416 \setcounter{hintLevel}{0}
           Create an empty shell to renew
```

 $417 \newenvironment{hint}{}{}$

Now we renew the environment as needed, this should allow support for any transition code that treats some parts as a "handout" and some parts as non-handout. renewing the environment on the fly is a bit hacky.

```
418 \renewenvironment{hint}
419 {
420 \ifhandout
```

```
\setbox0\vbox\bgroup
                 422

Only in HTML or PDF

580

Ximera provides several techniques to display some content only in the PDF, or only online. The prompt environment can be used to hide the data-entry part of a problem from the PDF: it's contents only get displayed online.

The lower level commands \pdfOnly and \htmlOnly also limit the output to either PDF or online, similarly to the environments onlyPdf and onlyHtml.

If \xmPrintHtmlOnlyAlsoInPdf is set, the online/html only things are printed in the PDF anyway (e.g. for review).

Unfortunately it is not possible in LATEX to have a command and an environment with the same name. We opted for the above (confusing...) names.

For backward compatibility, the deprecated environment onlineOnly is identical to onlyHtml.

For more advanced usage also commands \ifonline and ifonlineTF are provided.

The technique used to distinguish between the PDF-version and the online HTML-version is always the existence of the TeX4ht macro \HCode. Older distinctions such as \ifxake, ifhandout or \iftikzexport should no longer be used for this purpose.

```
The prompt part for mathmode

2.5.7 Labels and references

\label Labels and refs both generate anchors. A \label can be referenced from any file in the xourse.

```
883 \*htXimera\\
884 \let\oldlabel\label
885 \renewcommand{\label}[1]{\oldlabel{#1}\\\HCode{\a class="ximera-label" id="#1">\</a>}}
886 \/htXimera\
```

\ref A \ref can connect one T_EX file to another if they are in the same xourse.

```
887 \ htXimera \\
888 \renewcommand{\ref}[1]{\\$HCode{<a class="reference" href="\\$#1">$$1</a>}} \\
889 \/\$htXimera
```

2.6 Images

2.6.1 Images

image (env.) Place images inside an image environment. On paper, this centers the image. On the \mmDefaultGraphicsPath web, this provides additional benefits. Base graphicspath, deafult '/xmPictures'. Can only be changed BEFORE loading ximera.cls!

```
890 (*classXimera)
     891 % Provide a default graphicspath
     892 % (somewhat tricky: an activity can be included in a xourse in a wildly different path !)
     893 % Suggested convention: put all images in i /pictures folder in the root of your project
     894 \providecommand{\xmDefaultGraphicsPath}{/xmPictures}
      895 \graphicspath{ %% When looking for images,
                         %% look here first,
      897 {.\xmDefaultGraphicsPath/} %% then look for a pictures folder,
      898 {..\xmDefaultGraphicsPath/}
                                       %% then look for a pictures folder,
      899 {../..\xmDefaultGraphicsPath/}
                                          %% then look for a pictures folder,
     900 {../../..\xmDefaultGraphicsPath/}
                                             %% then look for a pictures folder,
     901 }
     902 %\newenvironment{image}[1][]{\begin{center}}{\end{center}}

On the web, you might also expect these to be "problem environments" but they aren't – they're respondables. You might expect a \setcounter{choiceId}{0} here — that would be wrong, because then the generated IDs would no longer be unique.

2.11 Word choice

\wordChoice An in-line version of multipleChoice: uses enumitem package note, it is coded as a single line to avoid unwanted spaces in "given" mode.

```
1288 (*classXimera)
1289 \newcommand{\wordChoice}[1]{%
1290 \let\choicetemp\choice% Assign a "choicetemp" command to duplicate choice.
1291 \ifwordchoicegiven% If wordchoice option is on, we need to juggle around some definitions.
1292 \let\choice\otherchoice%
1293 %\begin{multipleChoice@}% -unnecessary (REMOVE THIS LINE IF THE YEAR IS 2019 or Beyond)
1294 #1
1295 %\end{multipleChoice@}% -unnecessary (REMOVE THIS LINE IF THE YEAR IS 2019 or Beyond)
1296 \else% If it isn't the regular "choice" command should work.
1297 \let\choice\inlinechoice%
1298 \begin{multipleChoice@}%
1299 #1%
1300 \end{multipleChoice@}%
1301 \fi%
1302 \let\choice\choicetmp% Now that choicetmp has been manipulated to what we want, replace cho.
1304
1305
1306 (/classXimera)
This is actually just word choice
```

1309 \ConfigureEnv{multipleChoice@}{\stepcounter{identification}\IgnorePar\HCode{<span class="work and configure configuration configure configure configure configure configuration configure configure configuration configure configuration confi

2.12 Select all

1307 (*htXimera)

1310 (/htXimera)

```
selectAll (env.) A multiple-multiple choice question
```

1315 (/classXimera)

```
1311 (*classXimera)
1312 \newenvironment{selectAll}[1][]
1313 {\begin{trivlist}\item[\hskip \labelsep\small\bfseries Select All Correct Answers:]\hfil\beg.
1314 {\end{enumerate}\end{trivlist}}
```

In the future we need this to (optionally) be displayed in the problem, while the actual code lives in the solution. Here is how this could be implemented: Like the title/maketitle commands, the multiple-choice could be stored in \themultiplechoice, flip a boolean, and execute \makemultiplechoice at the \end of the problem. We should also make a

and execute \makemultiplechoice at the \end of the problem. We should also make a command called \showchoices that will show choices in the handout.

On the web, $\mathtt{selectAll}$ is handled just like $\mathtt{multipleChoice}$.

1308 \renewenvironment{multipleChoice@}{\refstepcounter{problem}}{}%

```

2.12.2 Feedback

feedback (env.) An initially hidden environment that uncovers itself at an appropriate time. New Validator rewrite code added by Jason Nowell. Original code orovided by Jim Fowler Validator is an environment designed to run a custom check on answers (usually) using javascript code.

Define a placeholder command for validator and feedback.

```
1373 \langle *classXimera \rangle
1374 \newcommand{\PH@Command}{}
```

Validator should take an argument and detokenize it and display it at the start of the environment. The original Validator environment had everything framed in an mbox; presumably to make the text look a bit nicer, although this seems redundant with texttt. It shouldn't cause any harm so I have left it in for now.

```
1375 \newenvironment{validator}[1][]{
1376 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" 1377 \mbox{\texttt{\detokenize\expandafter{\PH@Command}}}% Now expand PH@Command once and then defined 1379 \lambda{\textst}
```

First, if it's a handout, we want feedback to eat everything and then disappear entirely. So we do this:

If this isn't a handout, then we want to display the Feedback by using a label, positioned and formated as a \item in a trivlist. It is important that we also detokenize the content of the optional argument, as it is likely to contain javascript or other code that latex won't be able to make sense of.

```
1387 \else
1388 \newenvironment{feedback}[1][attempt]{
1389
                                      \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter"
1390
1391
                                      \begin{trivlist}% Begin the trivlist to use formating of the "Feedback" label.
1392
                                      \item[\hskip \labelsep\small\slshape\bfseries Feedback% Format the "Feedback" label. Don't :
                                      (\texttt{\detokenize\expandafter{\PH@Command}}):% Format (and detokenize) the condition for

```

2.12.3 Ungraded activities

1411 (/htXimera)

ungraded (env.) The ungraded environment is used to record that certain parts of activities should not be worth points. For example, if you want to use a multipleChoice as a survey question, you can place it inside an ungraded environment. On the LATEX side, the ungraded environment does nothing.

```
1412 (*classXimera)
1413 \newenvironment{ungraded}{}{}
1414 \( / classXimera \)
But on the html side, ungraded wraps the activities in a div in order to assign some weight to them for grading.
1415 \( *htXimera \)
1416 \( \text{renewenvironment} \( \text{ungraded} \) {\( \text{'kimera} \) \( \text{1417 \ifvmode \IgnorePar\fi \EndP\HCode} \) {\( \text{div class="ungraded">} \) \( \text{IgnoreIndent} \) \( \text{1418 \} \) {\( \text{1419 \ifvmode \IgnorePar\fi \EndP\HCode} \) {\( \text{div>} \) \\( \text{IgnoreIndent} \) \( \text{1420 } \) }
1421 \( \text{/htXimera} \)
```

2.13 Support for the web

2.13.1 MathJax support

1463

When using mathjax, dump all the \newcommands to a .jax file.

First, create the . jax file. Redefine newcommand appropriately.

```
1422 (*classXimera)
1423 %% Pre-202412: .jax file written in non-\HCode, and in a next run inserted by ximera.cfg in
1424 %% Post-202412: .mjax file written in \HCode, and in luaxake post-processing inerted in .htm.
1425 \ \% For backward-compatibility, the pre-202412 code is kept around for some time
1426 \% (and the extension .mjax was used to make both versions coexist...)
1427 \newwrite\myfile
1428 \ \ ifdefined \ \ HCode
1429 \immediate\openout\myfile=\jobname.xmjax
1431 \immediate\openout\myfile=\jobname.jax
1432 \fi
1433
1434 %% From |only.dtx| we must also create |prompt| on the MathJax side.
1435 \immediate\write\myfile{\unexpanded{\newenvironment}{prompt}{}}}
1436
1437 %% Write all newcommands to .xmjax file, that will be included in the .html via luaxake
1438 \let\@oldargdef\@argdef
1439 \long\def\@argdef#1[#2]#3{%
1441 \@oldargdef#1[#2]{#3}%
1442 }
1443
1444 %% Same for \DeclareMathOperator
1445 \det 001dDeclareMathOperator DeclareMathOperator
1446 \ \texttt{\lambda} \ \texttt{\lambda
1448 \langle / classXimera \rangle

1535
      \hbadness\@M}
1536 \def\endsuppress{\par\endgroup}
1537 \langle /classXimera \rangle
```

2.14.2 The End

It seems that some of the files need to conclude with something or another.

```
1538 \langle htXimera \rangle
1539 \langle Hinput \{ximera\}
1540 \langle htXimera \rangle
1541 \langle *htXourse \rangle
1542 \langle Hinput \{xourse\}
1543 \langle htXourse \rangle
1544 \langle *cfgXimera \rangle
1545 \langle begin \{document\}
1546 \langle EndPreamble
1547 \langle /cfgXimera \rangle
```

3 xourse.cls

```
1548 \langle *classXourse \rangle
```

notoc The default behavior of the class is to provide a table of contents listing all activities in the course. This option will supress this table of contents.

```
1549 \newif\ifnotoc
1550 \notocfalse
1551 \DeclareOption{notoc}{\notoctrue}
```

nonewpage The default behavior of the class is to start each activity on a new page. This option will start activities without making a new page.

```
1552 \newif\ifnonewpage
1553 \nonewpagefalse
1554 \DeclareOption{nonewpage}{\nonewpagetrue}
1555 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{ximera}}
1556 \ProcessOptions\relax
1557 \LoadClass{ximera}
1558 % \begin{macrocode}
1559 \( / classXourse \)
```

3.1 Activities

The core of the xourse system. It works by redefining the document environment, thus making the \begin and \end{document} of the subfile 'transparent' to the inclusion. The redefinition of \documentclass is analogous, just having a required and an optional arguments which mean nothing to \subfile.

```
 1560 \end{tabular} $$1561 \end{tabular} $$1561 \end{tabular} $$1562 \end{tabular} $$1563 \end{tabular} $$1564 \
```

Note that the new command \subfile calls for \skip@preamble within a group. The changes to document and \documentclass are undone after the inclusion of the subfile.

Numbering starts a page too soon without this:

```
1565 \left \left \other input \input
```

Store usual \maketitle as \othermaketitle

1566 \let\othermaketitle\maketitle

\maketitle In a xourse file, \maketitle is redefined to give course packet title page and toc.

```
1567 \renewcommand{\maketitle}{ %
1568 \pagestyle{empty}
1569 \begin{center}
1570 ~\\ %puts space at top of page to move title down.
1571 \vskip .25\textheight
1572 \hrulefill\\
1573 \vskip 1em
1574 \bfseries{\Huge \@title} \\
1575 \hrulefill\\
1576 \vskip 3em
1577 {\Large \@author}
1578 \vskip 2em
1579 {\large \@date}
1580 \end{center}
1581 \clearpage
```

When notoc option is used, we do not include a table of contents. Otherwise we include a table of contents in every course packet.

```
1582 \ifnotoc
1583 \else
1584 \tableofcontents\clearpage
1585 \clearpage
1586 \fi
```

Switch to main pagestyle, just like a document with document class ximera.

```
1587 \pagestyle{main}
```

Renew maketitle to usual definition.

 $1588 \ \verb|let|maketitle| othermaketitle|$

And we finish with our redefinition of \maketitle.

```
1589 }
1590 \relax
1591 \/classXourse\
```

3.1.1 Regular activities

\activity Documents included with \activity will be included in the body of the xourse document. Any \input commands within included ximera documents will be ignored. Any \usepackage commands within included ximera documents will cause an error. Overlapping \newcommand definitions within multiple ximera documents included simultaneously will cause an error. The \activity command inputs the file name provided without \documentclass, without \begin{document}/\end{document} and without any inputs in the preamble of the included file.

```
1592 (*classXourse)
          1593 \ifnonewpage
          1594 \newcommand{\activity}[2][]{%

1648 (/classXourse)
```

\subsection The name of a subsection inside an activity.

```
1649 (*classXourse)
1650 \ensuremath{\mbox{\mbox{$1650$}}} 1650 \ensuremath{\mbox{\mbox{\mbox{$1650$}}}} 1650 \ensuremath{\mbox{\mbox{\mbox{$1650$}}}} 1650 \ensuremath{\mbox{\mbox{\mbox{$1650$}}}} 1650 \ensuremath{\mbox{\mbox{\mbox{$1650$}}}} 1650 \ensuremath{\mbox{\mbox{\mbox{$1650$}}}} 1650 \ensuremath{\mbox{\mbox{$1650$}}} 1650 \ensuremath{\mbox{$1650$}}} 1650 \ensuremath{\mbox{\mbox{$1650$}}} 1650 \ensuremath{\mbox{$1650$}}} 1650 \ensuremath{\mbox{\mbox{$1650$}}} 1650 \ensuremath{\mbox{$1650$}}} 1650 \ensuremath{\mbox{\mbox{$1650$}}} 1650 \ensuremath{\mbox{$1650$}}} 1650 \ensuremath{\mbox{
1651 (/classXourse)
```

\part Xourse files can have parts. The name of a large part of a xourse.

```
1652 (*htXourse)
           1653 \newcounter{ximera@part}
           1654 \setcounter{ximera@part}{0}
           1655 \renewcommand\part[1]{%
           1656 \stepcounter{ximera@part}%
           1657 \ifvmode \IgnorePar\fi \EndP%
           1658 %\HCode{<h1 id="part\arabic{ximera@part}" class="card part">}#1\HCode{</h1>}% makes cards dis
           1659 \HCode{<h1 id="part\arabic{ximera@part}" class="card part">#1</h1>}%
           1660 \IgnoreIndent%
           1661 }
           1662 (/htXourse)
\paragraph Paragraph commands emit spans. A small heading.
           1663 (*cfgXimera)
           1664 \renewcommand{\paragraph}[1]{%
           1665
                 \HCode{<span class="paragraphHead">}%
           1666
           1667
                 \HCode{</span>}\par\IgnorePar}
           1668 (/cfgXimera)
```

\subparagraph An even smaller heading.

```
1669 (*cfgXimera)
1670 \renewcommand{\subparagraph}[1]{%
      \HCode{<span class="subparagraphHead">}%
1671
1672
1673
      \HCode{</span>}\par\IgnorePar}
1674 (/cfgXimera)
```

Grading by points 3.3

graded (env.) The graded environment does nothing in latex, but in html, it wraps the activities in a div in order to assign some weight to them for grading.

```
1675 (*classXourse)
1676 \newenvironment{graded}[1]{}{}
1677 (/classXourse)
```

So indeed this environment in html wraps the activities in a div in order to assign some number of points to them.

```
1678 (*htXourse)
1679 \renewenvironment{graded}[1]{%
1680 \ifvmode \IgnorePar\fi \EndP\\Code{<div class="graded" data-weight="#1">}\IgnoreIndent%
1682 \ifvmode \IgnorePar\fi \EndP\HCode{</div>}\IgnoreIndent%
1684 (/htXourse)
```

3.4 Logos

```
\logo A logo for the xourse.
      1685 (*classXourse)
      1686 \newcommand*{\logo}[1]{%
            \ifx\@onlypreamble\@notprerr
      1687
              \ClassError{xourse}{logo can only be used in the preamble}
      1688
      1689
                {Move your logo command to the preamble}
      1690
            \else %
              \IfFileExists{#1}%
      1691
                {\gdef\xourse@logo{#1}}%
      1692
                {\ClassError{xourse}{logo file does not exist}
      1693
                   {To use logo, make sure that the referenced image file exists}}%
      1694
            fi%
      1695
      1696 }
      1697
      1698 (/classXourse)
         The xourse logo is an og:image in the opengraph taxonomy.
      1699 (*htXourse)
      1700 \Configure{@HEAD}{%
           \HCode{<meta name="og:image" content="}%
