ximera — Simultaneously write print and online interactive materials.*

Jim Fowler Jeramiah Hocutt Oscar Levin Jason Nowell Hans Parshall Bart Snapp

Released 2018/10/28

Abstract

"Ximera begins where TFX ends." The ximera class aids in the creation of handouts, worksheets, exercises, and sections of textbooks to be used either individually or "glued" together via a xourse file. All ximera documents can be deployed in an online interactive form via xake See: Ximera Project and the source code on GitHub.

Introduction 1

2 ximera.cls

Options for the class

We start by listing the options for the ximera document class. Note, since the xourse class is based on the ximera class, all listed options are available there too.

1 (*classXimera)

The default behavior of the class is to display all content. This means that if any questions are asked, all answers are shown. Moreover, some content will only have a meaningful presentation when displayed online. When compiled without any options, this content will be shown too. This option will supress such content and generate a reasonable printiable "handout."

- 2 \newif\ifhandout
- 3 \handoutfalse
- 4 \DeclareOption{handout}{\handouttrue}

By default, authors are listed at the bottom of the first page of a document. This option will supress the listing of the authors.

- 5 \newif\ifnoauthor
- 6 \noauthorfalse
- 7 \DeclareOption{noauthor}{\noauthortrue}

By default, learning outcomes are listed at the bottom of the first page of a document. nooutcomes This option will supress the listing of the learning outcomes.

- 8 \newif\ifnooutcomes
- 9 \nooutcomesfalse
- 10 \DeclareOption{nooutcomes}{\nooutcomestrue}

instructornotes This option will turn on (and off) notes written for the instructor.

- 11 \newif\ifinstructornotes
- 12 \instructornotesfalse
- 13 \DeclareOption{instructornotes}{\instructornotestrue}

^{*}This file describes version v1.0, last revised 2018/10/28.

noinstructornotes This option will turn off (and on) notes written for the instructor.

14 \DeclareOption{noinstructornotes}{\instructornotestrue}

hints When the handout options is used, hints are not shown. This option will make hints visible in handout mode.

- 15 \newif\ifhints
- 16 \hintsfalse
- 17 \DeclareOption{hints}{\hintstrue}

newpage This option will start each problem-like environment (exercise, question, problem, and exploration) start on a new page.

- 18 \newif\ifnewpage
- 19 \newpagefalse
- 20 \DeclareOption{newpage}{\newpagetrue}

numbers This option will number the titles of the activity. By default the activities are unnumbered.

- 21 \newif\ifnumbers
- 22 \numbersfalse
- 23 \DeclareOption{numbers}{\numberstrue}

wordchoicegiven

This option will replace the choices shown by wordChoice with the correct choice. No indication of the wordChoice environment will be shown.

- 24 \newif\ifwordchoicegiven
- 25 \wordchoicegivenfalse
- 26 \DeclareOption{wordchoicegiven}{\wordchoicegiventrue}
- 27 \newif\iffirstinlinechoice% Support for other wordchoice command contents.
- 28 \firstinlinechoicetrue

2.2 Loading packages

```
Since we want \cancel to work, we load it here to avoid polluting the .jax output.
```

```
63 \RequirePackage[makeroom]{cancel}
```

Quite a few packages are required by the document class. This is a list of required packages. As packages are added to this list, we should include a comment as to where they are being utilized. This will help keep this list from being redundant and/or outdated.

```
64 \RequirePackage[inline] {enumitem}
65 \RequirePackage[pagestyles]{titlesec}
66 \RequirePackage{titletoc}
67 \RequirePackage{titling}
68 \RequirePackage{url}
69 \RequirePackage[table] {xcolor}
70 \RequirePackage{tikz}
71 \RequirePackage{pgfplots}
72 \usepgfplotslibrary{groupplots}
73 \usetikzlibrary{calc}
74 \RequirePackage{fancyvrb}
```

Load forloop for the problem environment dynamic naming and building.

```
75 \RequirePackage{forloop}
```

Now we load even more packages.

```
76 \RequirePackage{environ}% Included to allow saving of environment contents. This does *not* |
 77 \RequirePackage{amssymb}% Included to have access to math typeset.
 78 \RequirePackage{amsmath}% Included to have access to math typeset.
 79 \RequirePackage{amsthm}% Included to have access to math typeset.
 80 \ensuremath{\mbox{RequirePackage{xifthen}}\mbox{\% http://ctan.org/pkg/xifthen}}
 81 \RequirePackage{multido}% http://ctan.org/pkg/multido
 82 \RequirePackage{listings} %% is this required???
 83
 84 \RequirePackage{xkeyval}
 86 \RequirePackage{comment}
 87 (/classXimera)
Various packages must be loaded early to avoid polluting the .jax file.
 88 (*classXimera)
 89 \RequirePackage{gettitlestring}
 90 \RequirePackage{nameref}
 91 \RequirePackage{epstopdf}
 92 (/classXimera)
```

2.3Page setup

We want non-indented spaced-out paragraphs.

```
93 (*classXimera)
 94 \setlength{\parindent}{0pt}
 95 \setlength{\parskip}{5pt}
 96 (/classXimera)
To avoid weird margins in 2-sided mode, change the margins.
 97 (*classXimera)
 98 \oddsidemargin 62pt
 99 \evensidemargin 62pt
 100 \textwidth 345pt
 101 \headheight 14pt
 102 (/classXimera)
```

```
On the HTML side, there is more complicated page setup to perform.
 103 (*cfgXimera)
 104 \Preamble{xhtml}
 106 % We don't want to translate font suggestions with ugly wrappers like
```

```
107 % <span class="cmti-10"> for italic text
 108 \NoFonts
 109
110 % Don't output xml version tag
111 \Configure{VERSION}{}
113 % Output HTML5 doctype instead of the default for HTML4
114 \Configure{DOCTYPE}{\HCode{<!doctype html>\Hnewline}}
116 % Custom page opening
117 \Configure{HTML}{\HCode{<html lang="en">\Hnewline}}{\HCode{\Hnewline</html>}}
119 % Reset <head>, aka delete all default boilerplate; alternatively set up new content
 120 \Configure{@HEAD}{\HCode{<meta name="generator" content="TeX4ht (http://www.cse.ohio-state.ee
 121 \Configure{@HEAD}{\HCode{<meta name="ximera" content="version 0.0.1" />\Hnewline}}
 122 \Configure{@HEAD}{\HCode{<link href="https://ximera.osu.edu/public/stylesheets/standalone.cs

2.4.12 Foldable

The package mdframed is used to make pretty foldable, but the amsthm/mdframed conflict also messes up the .jax file so we don't load mdframed when performing the xake step. But even the below isn't enough to fix this.

605 %\iftikzexport\else\RequirePackage[framemethod=TikZ]{mdframed}\fi

```
Does it fold?
foldable

  793 (/htXimera)
2.5.6 Learning Outcomes
```

Specify a learning outcome, either at the level of a problem or an entire document in the \outcome preamble.

```
794 (*classXimera)
795 \def\theoutcomes{}
797 \ifdefined\HCode%
```

```
798 \newcommand{\outcome}[1]{}
799 \else%
800 \newwrite\outcomefile
801 \immediate\openout\outcomefile=\jobname.oc
802
803 \newcommand{\outcome}[1]{\edef\theoutcomes{\theoutcomes #1~}%
804 \immediate\write\outcomefile{\unexpanded{\outcome}{#1}}}
805 \fi%
806 \( /classXimera \)
```

These can appear in either the preamble or in problem environments. with pdflatex, we produce the .oc file which includes ALL the outcomes; in the tex4ht world, we just produce spans for the specific outcomes.

```
807 (*cfgXimera)
808 \renewcommand{\outcome}[1]{
809 \Configure{@HEAD}{\HCode{<meta name="learning-outcome" content="#1"/>\Hnewline}}
810 }
811 % Sometimes there are no outcomes at all
812 \IffileExists{\jobname.oc}{\input{\jobname.oc}}{}
813
814 \renewcommand{\outcome}[1]{%
815 \HCode{<span class="learning-outcome">#1</span>}
816 }
817 (/cfgXimera)
```

2.5.7 Labels and references

\label Labels and refs both generate anchors. A \label can be referenced from any file in the xourse.

```
818 \langle *htXimera \rangle
819 \let \circ label \
820 \renewcommand {\label} [1] {\oldlabel{#1}\HCode{<a class="ximera-label" id="#1"></a>}}
821 <math>\langle /htXimera \rangle
```

\ref A \ref can connect one TFX file to another if they are in the same xourse.

```
822 \ htXimera 823 \renewcommand{\ref}[1]{\HCode{<a class="reference" href="\##1">#1</a>}} 824 \ htXimera 824 \
```

2.6 Images

2.6.1 Images

image Place images inside an image environment. On paper, this centers the image. On the web, this provides additional benefits.

```
825 (*classXimera)
826 %\newenvironment{image}[1][]{\begin{center}}{\end{center}}
827 \NewEnviron{image}[1][3in]{%
828 \begin{center}\resizebox{#1}{!}{\BODY}\end{center}% resize and center
829 }
830 (/classXimera)
```

\alt Inside an image environment, \alt provides alt-text for assistive technology like screenreaders.

```
831 \*classXimera\\
832 \newcommand{\alt}[1]{}
833 \/classXimera\\
```

The image environment doesn't actually work in tex4ht as defined with NewEnviron; so this renewenvironment is needed. image-environment also gets formatted in a well, and when the user clicks on the image, it zooms in.

```
834 \(\angle *htXimera\)
835 \newcounter{imagealt}
836 \setcounter{imagealt}{0}
```

```
837 \renewenvironment{image}[1][]{\stepcounter{imagealt}%
      \ifvmode \IgnorePar\fi \EndP%
      \HCode{<div class="image-environment" role="img" aria-labelledby="image-alt-\arabic{imageai
840 }{\HCode{</div>}}

2.6.2 TikZ export

We generate SVGs and PNGs for any TikZ images, via the "externalize" feature of TikZ. Currently TikZ doesn't compile natively into the website because of how the xake bake compilation works. In order to make Tikz work, you need to get the tool mutool on the machine that is performing xake bake.

```
selectAll A multiple-multiple choice question
```

In the future we need this to (optionally) be displayed in the problem, while the actual code lives in the solution. Here is how this could be implemented: Like the title/maketitle commands, the multiple-choice could be stored in \themultiplechoice, flip a boolean,

and execute \makemultiplechoice at the \end of the problem. We should also make a command called \showchoices that will show choices in the handout.

On the web, selectAll is handled just like multipleChoice.

2.12.2 Feedback

feedback

An initially hidden environment that uncovers itself at an appropriate time. New Validator rewrite code added by Jason Nowell. Original code orovided by Jim Fowler Validator is an environment designed to run a custom check on answers (usually) using javascript code.

Define a placeholder command for validator and feedback.

```
1283 \; \langle *classXimera \rangle \\ 1284 \; \\ newcommand \{ PH@Command \} \{ \}
```

Validator should take an argument and detokenize it and display it at the start of the environment. The original Validator environment had everything framed in an mbox; presumably to make the text look a bit nicer, although this seems redundant with texttt. It shouldn't cause any harm so I have left it in for now.

```
1285 \newenvironment{validator}[1][]{
```

1286 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to 1287 \mbox{\texttt{\detokenize}expandafter{\PH@Command}}}% Now expand PH@Command once and then define 1288}{}

First, if it's a handout, we want feedback to eat everything and then disappear entirely. So we do this:

1289 \ifhandout%

If this isn't a handout, then we want to display the Feedback by using a label, positioned and formated as a \item in a trivlist. It is important that we also detokenize the content of the optional argument, as it is likely to contain javascript or other code that latex won't be able to make sense of.

```
1297 \else
1298 \newenvironment{feedback}[1][attempt]{
1300 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to
1301
1302 \begin{trivlist}% Begin the trivlist to use formating of the "Feedback" label.
1303 \item[\hskip \labelsep\small\slshape\bfseries Feedback% Format the "Feedback" label. Don't fo
1304 (\texttt{\detokenize\expandafter{\PH@Command}}):% Format (and detokenize) the condition for
1305 \hspace{2ex}]\small\slshape% Insert some space before the actual feedback given.
1306 }{
1307 \end{trivlist}
1308 }
1309
1310 \fi
1311 (/classXimera)
Feedback environments take an optional parameter (which describes when the feedback
is to be provided)

1321 (/htXimera)
```

2.12.3 Ungraded activities

ungraded

The ungraded environment is used to record that certain parts of activities should not be worth points. For example, if you want to use a multipleChoice as a survey question, you can place it inside an ungraded environment. On the LATEX side, the ungraded environment does nothing.

```
1322 \*classXimera\)
1323 \newenvironment{ungraded}{}{}
1324 \/classXimera\)
But on the html side, ungraded wraps the activities in a div in order to assign some weight to them for grading.

1325 \*htXimera\)
1326 \renewenvironment{ungraded}{%
1327 \ifvmode \IgnorePar\fi \EndP\HCode{<div class="ungraded">}\IgnoreIndent%
1328 }{
1329 \ifvmode \IgnorePar\fi \EndP\HCode{</div>}\IgnoreIndent%
1330 }
1331 \/htXimera\)
```

2.13 Support for the web

2.13.1 MathJax support

```
When using mathjax, dump all the \newcommands to a .jax file.
   First, create the .jax file.
1332 (*classXimera)
1333 \ifdefined\HCode
1334
     \else
1335
        \newwrite\myfile
1336
        \immediate\openout\myfile=\jobname.jax
1337 \fi
1338 (/classXimera)
From only.dtx we must also create prompt on the MathJax side.
1339 (*classXimera)
1340 \fi
1341 \else
        \immediate\write\myfile{\unexpanded{\newenvironment}{prompt}{}}}
1342
1343 \fi
1344 (/classXimera)
Redefine newcommand appropriately.
1345 \langle *classXimera \rangle
1346 \ifdefined\HCode
1347 \else
1348 \let\@oldargdef\@argdef
1349 \long\def\@argdef#1[#2]#3{%
1351 \@oldargdef#1[#2]{#3}%
1352 }
1353
1354 \let\@OldDeclareMathOperator\DeclareMathOperator
1355 \renewcommand{\DeclareMathOperator}[2]{\@OldDeclareMathOperator{#1}{#2}\immediate\write\myfi
1357 \fi
1358 (/classXimera)
Include the jax'ed newcommands
1359 (*cfgXimera)
1360 % Remove commands that use @
1361 \immediate\write18{sed -i "/@/d" \jobname.jax}
1362 % Replace ##1 with #1 and so forth
1363 \immediate\write18{sed -i "s/\string#\string\\([0-9]\string\\)/\string#\string\\1/g"

1453
1454 \def\endsuppress{\par\endgroup}
1455 (/classXimera)
```

2.14.2The End

It seems that some of the files need to conclude with something or another.

```
1456 (*htXimera)
1457 \Hinput{ximera}
1458 (/htXimera)
1459 (*htXourse)
1460 \Hinput{xourse}
1461 (/htXourse)
1462 (*cfgXimera)
1463 \begin{document}
1464 \EndPreamble
1465 (/cfgXimera)
```

3 xourse.cls

```
1466 (*classXourse)
```

notoc

The default behavior of the class is to provide a table of contents listing all activities in the course. This option will supress this table of contents.

```
1467 \newif\ifnotoc
1468 \setminus notocfalse
1469 \DeclareOption{notoc}{\notoctrue}
```

The default behavior of the class is to start each activity on a new page. This option will start activities without making a new page.

```
1470 \newif\ifnonewpage
1471 \nonewpagefalse
1472 \DeclareOption{nonewpage}{\nonewpagetrue}
```

```
1473 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{ximera}}
1474 \ProcessOptions\relax
1475 \LoadClass{ximera}
1476 % \begin{macrocode}
1477 \(/classXourse\)
```

3.1 Activities

The core of the xourse system. It works by redefining the document environment, thus making the \begin and \end{document} of the subfile 'transparent' to the inclusion. The redefinition of \documentclass is analogous, just having a required and an optional arguments which mean nothing to \subfile.

```
1478 \*classXourse\
1479 \newcommand{\skip@preamble}{\%
1480 \let\document\relax\let\enddocument\relax\\
1481 \newenvironment{\document}{\let\input\otherinput}{\}\%
1482 \renewcommand{\documentclass}[2][subfiles]{\}\\
```

Note that the new command \subfile calls for \skip@preamble within a group. The changes to document and \documentclass are undone after the inclusion of the subfile.

Numbering starts a page too soon without this:

```
1483 \let\otherinput\input
```

Store usual \maketitle as \othermaketitle

1484 \let\othermaketitle\maketitle

\maketitle In a xourse file, \maketitle is redefined to give course packet title page and toc.

```
1485 \renewcommand{\maketitle}{ %
1486 \pagestyle{empty}
1487 \begin{center}
1488 ~\\ %puts space at top of page to move title down.
1489 \vskip .25\textheight
1490 \hrulefill\\
1491 \vskip 1em
1492 \bfseries{\Huge \@title} \\
1493 \hrulefill\\
1494 \vskip 3em
1495 {\Large \@author}
1496 \vskip 2em
1497 {\large \@date}
1498 \end{center}
```

When notoc option is used, we do not include a table of contents. Otherwise we include a table of contents in every course packet.

```
1500 \ifnotoc
1501 \else
1502 \tableofcontents\clearpage
1503 \clearpage
1504 \fi
```

Switch to main pagestyle, just like a document with document class ximera.

```
1505 \pagestyle{main}
```

1499 \clearpage

Renew maketitle to usual definition.

1506 \let\maketitle\othermaketitle

And we finish with our redefinition of \maketitle.

```
1507 }
1508 \relax
1509 \/classXourse
```

3.1.1 Regular activities

\activity

Documents included with \activity will be included in the body of the xourse document. Any \input commands within included ximera documents will be ignored. Any \usepackage commands within included ximera documents will cause an error. Overlapping \newcommand definitions within multiple ximera documents included simultaneously will cause an error. The \activity command inputs the file name provided without \documentclass, without \begin{document}/\end{document} and without any inputs in the preamble of the included file.

```
1510 (*classXourse)
1511 \ifnonewpage
1512 \newcommand{\activity}[2][]{%
1513 \setkeys{activity}{#1}
    \renewcommand{\input}[1]{}
1514
     1515
     \let\input\otherinput}
1516
1517 \else
1518 \newcommand{\activity}[2][]{%

                                 3.3
                                               Grading by points
                                The graded environment does nothing in latex, but in html, it wraps the activities in a
                                 div in order to assign some weight to them for grading.
                                 1593 (*classXourse)
                                 1594 \newenvironment{graded}[1]{}{}
                                 1595 (/classXourse)
```

So indeed this environment in html wraps the activities in a div in order to assign some number of points to them.

3.4 Logos

\logo A logo for the xourse.

```
1603 (*classXourse)
1604 \newcommand*{\logo}[1]{%
