ximera — Simultaneously write print and online interactive materials.*

Jim Fowler Jeramiah Hocutt Oscar Levin Jason Nowell Hans Parshall Bart Snapp

Released 2018/10/28

Abstract

"Ximera begins where TFX ends." The ximera class aids in the creation of handouts, worksheets, exercises, and sections of textbooks to be used either individually or "glued" together via a xourse file. All ximera documents can be deployed in an online interactive form via xake See: Ximera Project and the source code on GitHub.

Introduction 1

2 ximera.cls

Options for the class

We start by listing the options for the ximera document class. Note, since the xourse class is based on the ximera class, all listed options are available there too.

1 (*classXimera)

The default behavior of the class is to display all content. This means that if any questions are asked, all answers are shown. Moreover, some content will only have a meaningful presentation when displayed online. When compiled without any options, this content will be shown too. This option will supress such content and generate a reasonable printiable "handout."

- 2 \newif\ifhandout
- 3 \handoutfalse
- 4 \DeclareOption{handout}{\handouttrue}

By default, authors are listed at the bottom of the first page of a document. This option will supress the listing of the authors.

- 5 \newif\ifnoauthor
- 6 \noauthorfalse
- 7 \DeclareOption{noauthor}{\noauthortrue}

By default, learning outcomes are listed at the bottom of the first page of a document. nooutcomes This option will supress the listing of the learning outcomes.

- 8 \newif\ifnooutcomes
- 9 \nooutcomesfalse
- 10 \DeclareOption{nooutcomes}{\nooutcomestrue}

instructornotes This option will turn on (and off) notes written for the instructor.

- 11 \newif\ifinstructornotes
- 12 \instructornotesfalse
- 13 \DeclareOption{instructornotes}{\instructornotestrue}

^{*}This file describes version v1.0, last revised 2018/10/28.

noinstructornotes This option will turn off (and on) notes written for the instructor.

14 \DeclareOption{noinstructornotes}{\instructornotestrue}

hints When the handout options is used, hints are not shown. This option will make hints visible in handout mode.

- 15 \newif\ifhints
- 16 \hintsfalse
- 17 \DeclareOption{hints}{\hintstrue}

newpage This option will start each problem-like environment (exercise, question, problem, and exploration) start on a new page.

- 18 \newif\ifnewpage
- 19 \newpagefalse
- 20 \DeclareOption{newpage}{\newpagetrue}

numbers This option will number the titles of the activity. By default the activities are unnumbered.

- 21 \newif\ifnumbers
- 22 \numbersfalse
- 23 \DeclareOption{numbers}{\numberstrue}

wordchoicegiven

This option will replace the choices shown by wordChoice with the correct choice. No indication of the wordChoice environment will be shown.

- 24 \newif\ifwordchoicegiven
- 25 \wordchoicegivenfalse
- 26 \DeclareOption{wordchoicegiven}{\wordchoicegiventrue}
- 27 \newif\iffirstinlinechoice% Support for other wordchoice command contents.
- 28 \firstinlinechoicetrue
- 29

2.2 Loading packages

```
Since we want \cancel to work, we load it here to avoid polluting the .jax output.
```

```
63 \RequirePackage[makeroom]{cancel}
```

Quite a few packages are required by the document class. This is a list of required packages. As packages are added to this list, we should include a comment as to where they are being utilized. This will help keep this list from being redundant and/or outdated.

```
64 \RequirePackage[inline] {enumitem}
65 \RequirePackage[pagestyles]{titlesec}
66 \RequirePackage{titletoc}
67 \RequirePackage{titling}
68 \RequirePackage{url}
69 \RequirePackage[table] {xcolor}
70 \RequirePackage{tikz}
71 \RequirePackage{pgfplots}
72 \usepgfplotslibrary{groupplots}
73 \usetikzlibrary{calc}
74 \RequirePackage{fancyvrb}
```

Load forloop for the problem environment dynamic naming and building.

```
75 \RequirePackage{forloop}
```

Now we load even more packages.

```
76 \RequirePackage{environ}% Included to allow saving of environment contents. This does *not* |
 77 \RequirePackage{amssymb}% Included to have access to math typeset.
 78 \RequirePackage{amsmath}% Included to have access to math typeset.
 79 \RequirePackage{amsthm}% Included to have access to math typeset.
 80 \ensuremath{\mbox{RequirePackage{xifthen}}\mbox{\% http://ctan.org/pkg/xifthen}}
 81 \RequirePackage{multido}% http://ctan.org/pkg/multido
 82 \RequirePackage{listings} %% is this required???
 83
 84 \RequirePackage{xkeyval}
 86 \RequirePackage{comment}
 87 (/classXimera)
Various packages must be loaded early to avoid polluting the .jax file.
 88 (*classXimera)
 89 \RequirePackage{gettitlestring}
 90 \RequirePackage{nameref}
 91 \RequirePackage{epstopdf}
 92 (/classXimera)
```

2.3Page setup

We want non-indented spaced-out paragraphs.

```
93 (*classXimera)
 94 \setlength{\parindent}{0pt}
 95 \setlength{\parskip}{5pt}
 96 (/classXimera)
To avoid weird margins in 2-sided mode, change the margins.
 97 (*classXimera)
 98 \oddsidemargin 62pt
 99 \evensidemargin 62pt
 100 \textwidth 345pt
 101 \headheight 14pt
 102 (/classXimera)
```

```
On the HTML side, there is more complicated page setup to perform.
 103 (*cfgXimera)
 104 \Preamble{xhtml}
 106 % We don't want to translate font suggestions with ugly wrappers like
```

```
107 % <span class="cmti-10"> for italic text
 108 \NoFonts
 109
110 % Don't output xml version tag
111 \Configure{VERSION}{}
113 % Output HTML5 doctype instead of the default for HTML4
114 \Configure{DOCTYPE}{\HCode{<!doctype html>\Hnewline}}
116 % Custom page opening
117 \Configure{HTML}{\HCode{<html lang="en">\Hnewline}}{\HCode{\Hnewline</html>}}
119 % Reset <head>, aka delete all default boilerplate; alternatively set up new content
 120 \Configure{@HEAD}{\HCode{<meta name="generator" content="TeX4ht (http://www.cse.ohio-state.ee
 121 \Configure{@HEAD}{\HCode{<meta name="ximera" content="version 0.0.1" />\Hnewline}}
 122 \Configure{@HEAD}{\HCode{<link href="https://ximera.osu.edu/public/stylesheets/standalone.cs

2.4.12 Foldable

The package mdframed is used to make pretty foldable, but the amsthm/mdframed conflict also messes up the .jax file so we don't load mdframed when performing the xake step. But even the below isn't enough to fix this.

605 %\iftikzexport\else\RequirePackage[framemethod=TikZ]{mdframed}\fi

```
Does it fold?
foldable
           606 (*classXimera)

  793 (/htXimera)
2.5.6 Learning Outcomes
```

Specify a learning outcome, either at the level of a problem or an entire document in the \outcome preamble.

```
794 (*classXimera)
795 \def\theoutcomes{}
797 \ifdefined\HCode%
```

```
798 \newcommand{\outcome}[1]{}
799 \else%
800 \newwrite\outcomefile
801 \immediate\openout\outcomefile=\jobname.oc
802
803 \newcommand{\outcome}[1]{\edef\theoutcomes{\theoutcomes #1~}%
804 \immediate\write\outcomefile{\unexpanded{\outcome}{#1}}}
805 \fi%
806 \( /classXimera \)
```

These can appear in either the preamble or in problem environments. with pdflatex, we produce the .oc file which includes ALL the outcomes; in the tex4ht world, we just produce spans for the specific outcomes.

```
807 (*cfgXimera)
808 \renewcommand{\outcome}[1]{
809 \Configure{@HEAD}{\HCode{<meta name="learning-outcome" content="#1"/>\Hnewline}}
810 }
811 % Sometimes there are no outcomes at all
812 \IffileExists{\jobname.oc}{\input{\jobname.oc}}{}
813
814 \renewcommand{\outcome}[1]{%
815 \HCode{<span class="learning-outcome">#1</span>}
816 }
817 \( /cfgXimera \)
```

2.5.7 Labels and references

\label Labels and refs both generate anchors. A \label can be referenced from any file in the xourse.

```
818 \langle *htXimera \rangle
819 \let \circ label \
820 \renewcommand {\label} [1] {\oldlabel{#1}\HCode{<a class="ximera-label" id="#1"></a>}}
821 <math>\langle /htXimera \rangle
```

\ref A \ref can connect one TFX file to another if they are in the same xourse.

```
822 \ htXimera 823 \renewcommand{\ref}[1]{\HCode{<a class="reference" href="\##1">#1</a>}} 824 \ htXimera 824 \
```

2.6 Images

2.6.1 Images

image Place images inside an image environment. On paper, this centers the image. On the web, this provides additional benefits.

```
825 (*classXimera)
826 %\newenvironment{image}[1][]{\begin{center}}{\end{center}}
827 \NewEnviron{image}[1][3in]{%
828 \begin{center}\resizebox{#1}{!}{\BODY}\end{center}% resize and center
829 }
830 (/classXimera)
```

\alt Inside an image environment, \alt provides alt-text for assistive technology like screenreaders.

```
831 \*classXimera\\
832 \newcommand{\alt}[1]{}
833 \/classXimera\\
```

The image environment doesn't actually work in tex4ht as defined with NewEnviron; so this renewenvironment is needed. image-environment also gets formatted in a well, and when the user clicks on the image, it zooms in.

```
834 \(\angle *htXimera\)
835 \newcounter{imagealt}
836 \setcounter{imagealt}{0}
```

```
837 \renewenvironment{image}[1][]{\stepcounter{imagealt}%
      \ifvmode \IgnorePar\fi \EndP%
      \HCode{<div class="image-environment" role="img" aria-labelledby="image-alt-\arabic{imageai
840 }{\HCode{</div>}}
841 \renewcommand{\alt}[1]{\HCode{<div style="display: none;" id="image-alt-\arabic{imagealt}">};
842 (/htXimera)
Although we accept many formats, SVG is preferred on the web. Since we have a different
mechanism for producing alt text, we want to ignore tex4ht's own method fo producing
843 (*cfgXimera)
844 \DeclareGraphicsExtensions{.jpg,.png,.gif,.svg}
845 \setminus Configure\{graphics*\}
      {\Configure{Needs}{File: \Gin@base.svg}\Needs{}}

849 }
850 \langle /cfgXimera \rangle
This is a hack to kill includegraphics commands in \documentclass{standalone}
851 (*cfgXimera)
```

856 〈/cfgXimera〉

```
PGF sometimes causes trouble, but we simply don't care in tex4ht mode.

857 (*htXimera)

858 \newcommand{\pgfsyspdfmark}[3]{}

859 (/htXimera)
```

852 \ifcsname ifstandalone\endcsname

\renewcommand\includegraphics[2][]{}

\ifstandalone

854

855

\fi

2.6.2 TikZ export

We generate SVGs and PNGs for any TikZ images, via the "externalize" feature of TikZ. Currently TikZ doesn't compile natively into the website because of how the xake bake compilation works. In order to make Tikz work, you need to get the tool mutool on the machine that is performing xake bake.

```

1198 (*htXimera)
1199 \renewenvironment{multipleChoice@}{\refstepcounter{problem}}{}%
1200 \verb|\configureEnv{multipleChoice@}{\step counter{identification}\IgnorePar\\\step class="word in the configureEnv{multipleChoice@}{\step counter{identification}\label{figureEnv}|} \\
1201 (/htXimera)
```

Select all 2.12

selectAll A multiple-multiple choice question

```
1202 (*classXimera)
1203 \newenvironment{selectAll}[1][]
1204 {\begin{trivlist}\item[\hskip \labelsep\small\bfseries Select All Correct Answers:]\hfil\begin{trivlist}
         {\end{enumerate}\end{trivlist}}
1206 (/classXimera)
```

In the future we need this to (optionally) be displayed in the problem, while the actual code lives in the solution. Here is how this could be implemented: Like the title/maketitle commands, the multiple-choice could be stored in \themultiplechoice, flip a boolean, and execute \makemultiplechoice at the \end of the problem. We should also make a command called \showchoices that will show choices in the handout.

On the web, selectAll is handled just like multipleChoice.

```

1263 (/htXimera)
```

2.12.2 Feedback

feedback

An initially hidden environment that uncovers itself at an appropriate time. New Validator rewrite code added by Jason Nowell. Original code orovided by Jim Fowler Validator is an environment designed to run a custom check on answers (usually) using javascript code.

Define a placeholder command for validator and feedback.

```
\begin{array}{c} 1264 \ \langle *classXimera \rangle \\ 1265 \ \backslash PH@Command \} \end{array}
```

Validator should take an argument and detokenize it and display it at the start of the environment. The original Validator environment had everything framed in an mbox; presumably to make the text look a bit nicer, although this seems redundant with texttt. It shouldn't cause any harm so I have left it in for now.

```
1266 \newenvironment{validator}[1][]{
```

1267 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to 1268 \mbox{\texttt{\detokenize\expandafter{\PH@Command}}}% Now expand PH@Command once and then de 1269 }{}

First, if it's a handout, we want feedback to eat everything and then disappear entirely. So we do this:

1278 \else

If this isn't a handout, then we want to display the Feedback by using a label, positioned and formated as a \item in a trivlist. It is important that we also detokenize the content of the optional argument, as it is likely to contain javascript or other code that latex won't be able to make sense of.

```
1279 \newenvironment{feedback}[1][attempt]{
1280
1281 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to
1282
1283 \begin{trivlist}% Begin the trivlist to use formating of the "Feedback" label.
```

1284 \item[\hskip \labelsep\small\slshape\bfseries Feedback% Format the "Feedback" label. Don't for 1285 (\texttt{\detokenize\expandafter{\PH@Command}}):% Format (and detokenize) the condition for 1285 (\texttt{\detokenize\expandafter}) and the second format the s

1286 \hspace{2ex}]\small\slshape% Insert some space before the actual feedback given.

```
1287 }{
1288 \end{trivlist}
1289 }
1290
1291 \fi
1292 \langle /classXimera \rangle
Feedback environments take an optional parameter (which describes when the feedback
is to be provided)
1293 (*htXimera)
1294 \end{\code} {\tt \code} {\tt \cod
1295 \def\@feedbackattempt{\@feedbackcode[attempt]}
1296 \def\@feedbackcode[#1]{\stepcounter{identification}%
1297 \ifvmode \IgnorePar\fi \EndP%
1298 \ \texttt{\def} \ \texttt{\def}
1299 {\ifthenelse{\equal{#1}{correct}}{\HCode{<div class="feedback" data-feedback="correct" id="fe

1301 \def\endfeedback{\HCode{</div>}\IgnoreIndent}
1302 (/htXimera)
```

2.12.3 Ungraded activities

ungraded

The ungraded environment is used to record that certain parts of activities should not be worth points. For example, if you want to use a multipleChoice as a survey question, you can place it inside an ungraded environment. On the LATEX side, the ungraded environment does nothing.

```
1303 (*classXimera)
1304 \newenvironment{ungraded}{}{}
1305 (/classXimera)
```

But on the html side, ungraded wraps the activities in a div in order to assign some weight to them for grading.

```
1306 (*htXimera)
1307 \renewenvironment{ungraded}{%
1308 \ifvmode \IgnorePar\fi \EndP\HCode{<div class="ungraded">}\IgnoreIndent%
1309 }{
1310 \ifvmode \IgnorePar\fi \EndP\HCode{</div>}\IgnoreIndent%
1311 }
1312 \( /htXimera \)
```

2.13 Support for the web

2.13.1 MathJax support

1326 (*classXimera)

```
When using mathjax, dump all the \newcommands to a .jax file. First, create the .jax file.
```

```
1313 (*classXimera)
1314 \ifdefined\HCode
1315 \else
1316
         \newwrite\myfile
1317
         \immediate\openout\myfile=\jobname.jax
1319 (/classXimera)
From only.dtx we must also create prompt on the MathJax side.
1320 (*classXimera)
1321 \footnotemark \ifdefined\HCode
      \else
1323
         \immediate\write\myfile{\unexpanded{\newenvironment}{prompt}{}}}
1324 \fi
1325 (/classXimera)
Redefine newcommand appropriately.
```

```
1327 \ifdefined\HCode
     \else
1329 \let\@oldargdef\@argdef
1330 \long\def\@argdef#1[#2]#3{%
1332 \@oldargdef#1[#2]{#3}%
1333 }
1334
1335 \let\@OldDeclareMathOperator\DeclareMathOperator
1336 \renewcommand{\DeclareMathOperator}[2]{\@OldDeclareMathOperator{#1}{#2}\immediate\write\myfi
1338 \fi
1339 (/classXimera)
Include the jax'ed newcommands
1340 (*cfgXimera)
1341\,\% Remove commands that use @
1342 \immediate\write18{sed -i "/0/d" \jobname.jax}
1343 % Replace ##1 with #1 and so forth
1344 \immediate\write18{sed -i "s/\string#\string\\([0-9]\string\\)/\string#\string\\1/g"

2.14 Tools

2.14.1 Suppress

suppress

The suppress environment is a good way to suppress output without commenting it. This way we can avoid many of the places we use environ package and this should also avoid most of the verbatim conflicts. This is code adapted from syntonly.sty.

```
1412 (*classXimera)
1413 \font\dummyft@=dummy \relax
1414 \def\suppress{%
1415
      \begingroup\par
      \parskip\z@
1416
1417
      \offinterlineskip
1418
      \baselineskip=\z@skip
1419
      \lineskip=\z@skip
1420
      \lineskiplimit=\maxdimen
      \dummyft@
1421
      \count@\sixt@@n
1422
      \loop\ifnum\count@ >\z@
1423
        \advance\count@\m@ne
1424
1425
        \textfont\count@\dummyft@
        \scriptfont\count@\dummyft@
1426
1427
        \scriptscriptfont\count@\dummyft@
1428
1429
      \let\selectfont\relax
```

```
1430 \let\mathversion\@gobble
1431 \let\getanddefine@fonts\@gobbletwo
1432 \tracinglostchars\z@
1433 \frenchspacing
1434 \hbadness\@M}
1435 \def\endsuppress{\par\endgroup}
1436 \( / classXimera \)
```

2.14.2 The End

It seems that some of the files need to conclude with something or another.

```
1437 (*htXimera)
1438 \Hinput{ximera}
1439 (/htXimera)
1440 (*htXourse)
1441 \Hinput{xourse}
1442 (/htXourse)
1443 (*cfgXimera)
1444 \begin{document}
1445 \EndPreamble
1446 (/cfgXimera)
```

3 xourse.cls

```
1447 (*classXourse)
```

notoc The default behavior of the class is to provide a table of contents listing all activities in the course. This option will supress this table of contents.

```
1448 \newif\ifnotoc
1449 \notocfalse
1450 \DeclareOption{notoc}{\notoctrue}
```

nonewpage

The default behavior of the class is to start each activity on a new page. This option will start activities without making a new page.

```
1451 \newif\ifnonewpage
1452 \nonewpagefalse
1453 \DeclareOption{nonewpage}{\nonewpagetrue}

1454 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{ximera}}

1455 \ProcessOptions\relax

1456 \LoadClass{ximera}

1457 % \begin{macrocode}

1458 \(/classXourse\)
```

3.1 Activities

The core of the xourse system. It works by redefining the document environment, thus making the \begin and \end{document} of the subfile 'transparent' to the inclusion. The redefinition of \documentclass is analogous, just having a required and an optional arguments which mean nothing to \subfile.

Note that the new command \subfile calls for \skip@preamble within a group. The changes to document and \documentclass are undone after the inclusion of the subfile.

Numbering starts a page too soon without this:

```
1464 \let\otherinput\input
```

```
Store usual \maketitle as \othermaketitle
            1465 \let\othermaketitle\maketitle
            In a xourse file, \maketitle is redefined to give course packet title page and toc.
\maketitle
            1466 \renewcommand{\maketitle}{ %
            1467 \pagestyle{empty}
            1468 \begin{center}
            1469 ^{\sim}\\ %puts space at top of page to move title down.
            1470 \vskip .25\textheight
            1471 \hrulefill\\
            1472 \vskip 1em
            1474 \hrulefill\\
            1475 \vskip 3em
            1476 {\Large \@author}
            1477 \vskip 2em
            1478 {\large \@date}
            1479 \end{center}
            1480 \clearpage
            When notoc option is used, we do not include a table of contents. Otherwise we include
            a table of contents in every course packet.
            1481 \ifnotoc
            1482 \else
            1483
                  \tableofcontents\clearpage
                  \clearpage
            1485 \fi
            Switch to main pagestyle, just like a document with document class ximera.
            1486 \pagestyle{main}
            Renew maketitle to usual definition.
            1487 \let\maketitle\othermaketitle
            And we finish with our redefinition of \maketitle.
            1488 }
            1489 \relax
            1490 (/classXourse)
```

3.1.1 Regular activities

\activity

Documents included with \activity will be included in the body of the xourse document. Any \input commands within included ximera documents will be ignored. Any \usepackage commands within included ximera documents will cause an error. Overlapping \newcommand definitions within multiple ximera documents included simultaneously will cause an error. The \activity command inputs the file name provided without \documentclass, without \begin{document}/\end{document} and without any inputs in the preamble of the included file.

```
1491 (*classXourse)
1492 \ifnonewpage
1493 \newcommand{\activity}[2][]{%
1494 \setkeys{activity}{#1}
     \renewcommand{\input}[1]{}
1495
      \begingroup\skip@preamble\otherinput{#2}\endgroup\par\vspace{\topsep}
1496
      \let\input\otherinput}
1497
1498 \else
1499 \newcommand{\activity}[2][]{%
1500 \setkeys{activity}{#1}
      \renewcommand{\input}[1]{}
      \begingroup\skip@preamble\otherinput{#2}\endgroup\clearpage
1503
      \let\input\otherinput}
1504 \fi
1505 \relax
1506 (/classXourse)
```

```
1507 (*htXourse)
                             1508 \renewcommand\activity[2][]{%
                             1509 \ifvmode \IgnorePar\fi \EndP\HCode{<a class="activity card \activitystyle" href="#2" data-op
                             1510 }
                             1511 (/htXourse)
                                    When running xake, we can just ignore activities
                             1512 (*classXourse)
                             1513 \ifxake
