# ximera — Simultaneously write print and online interactive materials.\*

Jim Fowler Jeramiah Hocutt Oscar Levin Jason Nowell Wim Obbels Hans Parshall Bart Snapp

Released 2024/05/12

#### Abstract

"Ximera begins where TEX ends." The ximera class aids in the creation of handouts, worksheets, exercises, and sections of textbooks to be used either individually or "glued" together via a xourse file. All ximera documents can be deployed in an online interactive form via xake See: Ximera Project and the source code on GitHub.

# 1 Introduction

Ximera, pronounced "chimera," (Ximera: Interactive, Mathematics, EResources, for All) is an open-source platform that provides tools for authoring and publishing (PDF and Online), open-source, interactive educational content, such as textbooks, assessments, and online courses. The Ximera document class provides the following features:

Formatting for different domains The Ximera document class provides built-in support for formatting documents in both PDF and online formats, which can be a big time-saver for authors. Additionally, it allows for the simultaneous creation of solution manuals and teaching editions, which can be especially useful for educators.

Compiling individually or as a whole With the Ximera document class, authors can easily compile individual documents or an entire collection of documents. This flexibility can be helpful when making changes to specific documents without having to re-compile the entire collection. Moreover, this allows an author to share large portions of a text with another, with minimal changes.

Interactive content The Ximera document class allows for the inclusion of interactive content, such as answer boxes that are validated by a client-side computer algebra system. Additionally, it allows for the embedding of YouTube videos, Desmos graphs, and GeoGebra interactives.

All content displayed By default, the Ximera document class displays all content to the author. This means the author see what the students see, along with answers and solutions, and links (that can be checked) to various interactive elements (when deployed, the interactive elements are truly embedded). This can be especially helpful for catching errors or inconsistencies in the content.

Online examples can be found at

https://go.osu.edu/ximera-examples

<sup>\*</sup>This file describes version v1.5.1, last revised 2024/05/12.

#### 2 ximera.cls

#### 2.1Options for the class

We start by listing the options for the ximera document class. Note, since the xourse class is based on the ximera class, all listed options are available there too.

1 (\*classXimera)

handout

The default behavior of the class is to display all content. This means that if any questions are asked, all answers are shown. Moreover, some content will only have a meaningful presentation when displayed online. When compiled without any options, this content will be shown too. This option will supress such content and generate a reasonable printiable "handout."

- 2 \newif\ifhandout
- 3 \handoutfalse
- 4 \DeclareOption{handout}{\handouttrue}

By default, authors are listed at the bottom of the first page of a document. This option noauthor will supress the listing of the authors.

- 5 \newif\ifnoauthor
- $6 \setminus noauthorfalse$
- 7 \DeclareOption{noauthor}{\noauthortrue}

nooutcomes

By default, learning outcomes are listed at the bottom of the first page of a document. This option will supress the listing of the learning outcomes.

- 8 \newif\ifnooutcomes
- 9 \nooutcomesfalse
- 10 \DeclareOption{nooutcomes}{\nooutcomestrue}

instructornotes

This option will turn on (and off) notes written for the instructor.

- 11 \newif\ifinstructornotes
- 12 \instructornotesfalse
- 13 \DeclareOption{instructornotes}{\instructornotestrue}

noinstructornotes This option will turn off (and on) notes written for the instructor.

hints When the handout options is used, hints are not shown. This option will make hints visible in handout mode.

- 15 \newif\ifhints
- 16 \hintsfalse
- 17 \DeclareOption{hints}{\hintstrue}

This option will start each problem-like environment (exercise, question, problem, and exploration) start on a new page.

- 18 \newif\ifnewpage
- 19 \newpagefalse
- 20 \DeclareOption{newpage}{\newpagetrue}

This option will number the titles of the activity. By default the activities are unnum-

- 21 \newif\ifnumbers
- 22 \numbersfalse
- 23 \DeclareOption{numbers}{\numberstrue}

wordchoicegiven

This option will replace the choices shown by wordChoice with the correct choice. No indication of the wordChoice environment will be shown.

- 24 \newif\ifwordchoicegiven
- 25 \wordchoicegivenfalse
- 26 \DeclareOption{wordchoicegiven}{\wordchoicegiventrue}
- 27 \newif\iffirstinlinechoice% Support for other wordchoice command contents.
- 28 \firstinlinechoicetrue

# 2.2 Loading packages

Since we want \cancel to work, we load it here to avoid polluting the .jax output.

```
63 \RequirePackage[makeroom]{cancel}
```

Quite a few packages are required by the document class. This is a list of required packages. As packages are added to this list, we should include a comment as to where they are being utilized. This will help keep this list from being redundant and/or outdated.

```
64 \RequirePackage[inline] {enumitem}
65 \RequirePackage[pagestyles] {titlesec}
66 \RequirePackage{titletoc}
67 \RequirePackage{titling}
68 \RequirePackage{url}
69 \RequirePackage[table] {xcolor}
70 \RequirePackage{tikz}
71 \RequirePackage{pgfplots}
72 \usepfplotslibrary{groupplots}
73 \usetikzlibrary{calc}
74 \RequirePackage{fancyvrb}
```

Load forloop for the problem environment dynamic naming and building.

```
75 \RequirePackage{forloop}
```

Now we load even more packages.

```
76 \RequirePackage{environ}% Included to allow saving of environment contents. This does *not* properties of the state of the same of the state of the same of the
```

```
81 \RequirePackage{multido}% http://ctan.org/pkg/multido
 82 \RequirePackage{listings} %% is this required???
 84 \RequirePackage{xkeyval}
 86 \RequirePackage{comment}
 87 (/classXimera)
Various packages must be loaded early to avoid polluting the .jax file.
 88 (*classXimera)
 89 \RequirePackage{gettitlestring}
 90 \ensuremath{\mbox{\sc NequirePackage\{nameref\}}}
 91 \RequirePackage{epstopdf}
 92 (/classXimera)
2.3
      Page setup
We want non-indented spaced-out paragraphs.
 93 (*classXimera)
 94 \setlength{\parindent}{0pt}
 95 \setlength{\parskip}{5pt}
 96 (/classXimera)
To avoid weird margins in 2-sided mode, change the margins.
 97 (*classXimera)
 98 \oddsidemargin 62pt
 99 \evensidemargin 62pt
 100 \textwidth 345pt
 101 \headheight 14pt
 102 (/classXimera)
On the HTML side, there is more complicated page setup to perform.
 103 (*cfgXimera)
104 \Preamble{xhtml}
106 % We don't want to translate font suggestions with ugly wrappers like
 107 % <span class="cmti-10"> for italic text
 108 \NoFonts
110 % Don't output xml version tag
111 \Configure{VERSION}{}
112
113 % Output HTML5 doctype instead of the default for HTML4
114 \Configure{DOCTYPE}{\HCode{<!doctype html>\Hnewline}}
116 % Custom page opening
117 \Configure{\HCode{\html lang="en">\Hnewline}}{\HCode{\html>}}
119 % Reset <head>, aka delete all default boilerplate; alternatively set up new content
120 \Configure{@HEAD}{\HCode{<meta name="generator" content="TeX4ht (http://www.cse.ohio-state.ee

```

#### 2.4 Structure

#### 2.4.1 Macros

```
Makes everymath display style even when inline, could be optional.
```

- 133 \everymath{\displaystyle}
- 134 (/classXimera)

Ok not everything, we also need to configure "display style" limits.

```
135 (*classXimera)
```

- 136 \let\prelim\lim
- 137 \renewcommand{\lim}{\displaystyle\prelim}
- 138 (/classXimera)

#### 2.4.2 Theorem and theorem-like environments

On the web, a theorem is emitted as a special <div>.

```
139 (*htXimera)
```

- 140 \newcommand{\ConfigureTheoremEnv}[1]{%
- 141 \renewenvironment{#1}[1][]{\refstepcounter{problem}%
- $142 \left\{ \frac{\#1}{}\right\}$
- \HCode{<span class="theorem-like-title">}##1\HCode{</span>}%
- 144 }}{}
- 146 }
- 147 (/htXimera)
- $148 \ \langle {\it classXimera} \rangle {\it theoremstyle} \{ {\it definition} \} \ \% \ {\it No italic (because this makes also text in TikZ italic)} \} \\$

145 \ConfigureEnv{#1}{\stepcounter{identification}\ifvmode \IgnorePar\fi \EndP\HCode{<div class=

The key is to make sure that the theorem environments are defined in a corresponding fashion on the web and on paper.

2.4.6 Hints
Hint environments can be embedded inside problems.
 391 (*classXimera)
Create a counter that will track how deeply nested the current hint is
 392 \newcounter{hintLevel}
 393 \setcounter{hintLevel}{0}
Create an empty shell to renew
 394 \newenvironment{hint}{}{}
Now we renew the environment as needed, this should allow support for any transition
code that treats some parts as a "handout" and some parts as non-handout. renewing
the environment on the fly is a bit hacky.
 395 \renewenvironment{hint}
 396 {
 397 \ifhandout

#### 2.5.1 Metadata

To encourage authors to include relevant parseable metadata in the preamble, we define some currently ignored commands.

\license

In the preamble, use \license with an SPDX license expression.

```
687 (*classXimera)
```

688 \newcommand{\license}{\excludecomment}

689 (/classXimera)

# \acknowledgement

In the preamble, use **\acknowledgement** to credit others who contributed to the intellectual content beside the author.

```
690 (*classXimera)
```

691 \newcommand{\acknowledgement}{\excludecomment}

692 (/classXimera)

\tag

In the preamble, a \tag provides a free-form taxonomy.

```
693 (*classXimera)
```

694 \renewcommand{\tag}{\excludecomment}

695 (/classXimera)

On the HTML side, we mark the file as the appropriate kind of object—either activity or xourse.

```
696 (*htXourse)
```

697 % Mark this as a xourse file

698 \Configure{@HEAD}{\HCode{<meta name="description" content="xourse" />\Hnewline}}

699 (/htXourse)

#### 2.5.2 Abstract

abstract Every activity should include a short abstract.

```
700 (*classXimera)
```

701 \let\abstract\relax

 $702 \verb|\left| endabstract| relax|$ 

 $703\;\text{\%}$  Use of environ package, may want to find a better way.

 $704 \ensuremath{\tt NewEnviron{abstract}{\tt Nprotected@xdef\theabstract{\tt BODY}}}$ 

 $_{705}~\langle/\mathsf{classXimera}\rangle$ 

The abstract has been stored in **\theabstract** and should be emitted as a div. The code below is required for the abstract to show online.

```
706 (*cfgXimera)
```

707 \let\abstract\relax

 $708 \verb|\let\endabstract\relax|$ 

709 (/cfgXimera)

# 2.5.3 Titles and authors

## 2.5.4 Authors

\author Activities have authors. Warn the user if no author is provided.

```
710 (*classXimera)
```

711 \let\@emptyauthor\@author

712  $\def\author#1{\gdef\author{#1}}$ 

 $713 \end{author} \end{author} One of \end{author} one \end{author} in \end{author} one \e$ 

714 (/classXimera)

Include author name in meta tags

```
715 (*htXimera)
```

 $716 \verb|\Configure{QHEAD}{\HCode{<meta name="author" content="}\\\Qauthor\HCode{" />\Hnewline}}|$ 

717 (/htXimera)

The \and command would emit tabular environments which really should not appear in a meta tag.

718 (htXimera | classXimera)\def\and{and }

#### 2.5.5 Title

```
\title Activities have titles.
                       719 (*classXimera)
                       720 \left| \text{let}\right| 
                       721 \newcommand{\title}[1][]{{\protected@xdef\@pretitle{#1}}\protected@xdef\@title}
                       723 \title{}
                       724

# 2.5.6 Learning Outcomes

\outcome

Specify a learning outcome, either at the level of a problem or an entire document in the preamble.

```
806 (*classXimera)
807 \def\theoutcomes{}
808
809 \ifdefined\HCode%
     \newcommand{\outcome}[1]{}
810
811 \else%
812
     \newwrite\outcomefile
813
     \immediate\openout\outcomefile=\jobname.oc
815
     \newcommand{\outcome}[1]{\edef\theoutcomes{\theoutcomes #1~}%
816
     \immediate\write\outcomefile{\unexpanded{\outcome}{#1}}}
817
     \fi%
818 (/classXimera)
```

These can appear in either the preamble or in problem environments. with pdflatex, we produce the .oc file which includes ALL the outcomes; in the tex4ht world, we just produce spans for the specific outcomes.

```
819 \renewcommand{\outcome}[1]{
820 \renewcommand{\outcome}[1]{
821 \Configure{@HEAD}{\HCode{<meta name="learning-outcome" content="#1"/>\Hnewline}}
822 }
823 % Sometimes there are no outcomes at all
824 \IffileExists{\jobname.oc}{\input{\jobname.oc}}{\}
825
826 \renewcommand{\outcome}[1]{%
827 \HCode{<span class="learning-outcome">#1</span>}
828 }
829 \/cfgXimera\
```

#### 2.5.7 Labels and references

\label Labels and refs both generate anchors. A \label can be referenced from any file in the xourse.

```
830 \ *htXimera \ 831 \let\oldlabel\label \ 832 \renewcommand{\label}[1]{\oldlabel{#1}\HCode{<a class="ximera-label" id="#1"></a>}} 833 \ /htXimera \ A \ref can connect one T_EX file to another if they are in the same xourse. 834 \ *htXimera \ 835 \renewcommand{\ref}[1]{\HCode{<a class="reference" href="\##1">#1</a>}}
```

# 2.6 Images

836 (/htXimera)

\ref

### 2.6.1 Images

image Place images inside an image environment. On paper, this centers the image. On the web, this provides additional benefits.

```
837 (*classXimera)
838 %\newenvironment{image}[1][]{\begin{center}}{\end{center}}
839 \NewEnviron{image}[1][3in]{%
840 \begin{center}\resizebox{#1}{!}{\BODY}\end{center}% resize and center
841 }
842 (/classXimera)
```

\alt Inside an image environment, \alt provides alt-text for assistive technology like screenreaders.

```
843 (*classXimera)
844 \newcommand{\alt}[1]{}
845 (/classXimera)
```

The image environment doesn't actually work in tex4ht as defined with NewEnviron; so this renewenvironment is needed. image-environment also gets formatted in a well, and when the user clicks on the image, it zooms in.

```
846 (*htXimera)
847 \newcounter{imagealt}
848 \setcounter{imagealt}{0}
849 \renewenvironment{image}[1][]{\stepcounter{imagealt}}%
850 \ifvmode \IgnorePar\fi \EndP%
851 \HCode{<div class="image-environment" role="img" aria-labelledby="image-alt-\arabic{imagealt}}{\HCode{</div>}}
853 \renewcommand{\alt}[1]{\HCode{<div style="display: none;" id="image-alt-\arabic{imagealt}">}
854 (/htXimera)
```

Although we accept many formats, SVG is preferred on the web. Since we have a different mechanism for producing alt text, we want to ignore tex4ht's own method fo producing alt text.

```
855 (*cfgXimera)
856 \DeclareGraphicsExtensions{.jpg,.png,.gif,.svg}
857 \Configure{graphics*}
858 {svg}{
      {\Configure{Needs}{File: \Gin@base.svg}\Needs{}}
      \Picture[]{\csname Gin@base\endcsname.svg \csname a:Gin-dim\endcsname}%
861 }
862 (/cfgXimera)
This is a hack to kill includegraphics commands in \documentclass{standalone}
863 (*cfgXimera)
864 \ifcsname ifstandalone\endcsname
      \ifstandalone
        \renewcommand\includegraphics[2][]{}
866
867
      \fi
```

```
868 (/cfgXimera)
PGF sometimes causes trouble, but we simply don't care in tex4ht mode.
869 (*htXimera)
870 \newcommand{\pgfsyspdfmark}[3]{}
871 (/htXimera)
```

#### 2.6.2 TikZ export

We generate SVGs and PNGs for any TikZ images, via the "externalize" feature of TikZ. Currently TikZ doesn't compile natively into the website because of how the xake bake compilation works. In order to make Tikz work, you need to get the tool mutool on the machine that is performing xake bake.

```
872 (*classXimera)
873 \ifdefined\HCode
     \tikzexporttrue

1230 \renewenvironment{multipleChoice@}{\refstepcounter{problem}}{}%

In the future we need this to (optionally) be displayed in the problem, while the actual code lives in the solution. Here is how this could be implemented: Like the title/maketitle commands, the multiple-choice could be stored in \themultiplechoice, flip a boolean, and execute \makemultiplechoice at the \end of the problem. We should also make a command called \showchoices that will show choices in the handout.

On the web, selectAll is handled just like multipleChoice.

#### 2.12.2 Feedback

feedback

An initially hidden environment that uncovers itself at an appropriate time. New Validator rewrite code added by Jason Nowell. Original code orovided by Jim Fowler Validator is an environment designed to run a custom check on answers (usually) using javascript code.

Define a placeholder command for validator and feedback.

```
1295 \langle *classXimera \rangle
1296 \newcommand{\PH@Command}{}
```

Validator should take an argument and detokenize it and display it at the start of the environment. The original Validator environment had everything framed in an mbox; presumably to make the text look a bit nicer, although this seems redundant with texttt. It shouldn't cause any harm so I have left it in for now.

```
1297 \newenvironment{validator}[1][]{
```

1298 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to 1299 \mbox{\texttt{\detokenize\expandafter{\PH@Command}}}% Now expand PH@Command once and then defined by \$\{\frac{1300}}{\}\$

First, if it's a handout, we want feedback to eat everything and then disappear entirely. So we do this:

1324 (\*htXimera)

If this isn't a handout, then we want to display the Feedback by using a label, positioned and formated as a \item in a trivlist. It is important that we also detokenize the content of the optional argument, as it is likely to contain javascript or other code that latex won't be able to make sense of.

```
1309 \else
1310 \newenvironment{feedback}[1][attempt]{
1311
1312 \def\PH@Command{#1}% Use PH@Command to hold the content and be a target for "\expandafter" to
1313
1314 \begin{trivlist}% Begin the trivlist to use formating of the "Feedback" label.
1315 \item[\hskip \labelsep\small\slshape\bfseries Feedback% Format the "Feedback" label. Don't fo
1316 (\texttt{\detokenize\expandafter{\PH@Command}}): % Format (and detokenize) the condition for
1317 \hspace{2ex}]\small\slshape% Insert some space before the actual feedback given.
1318 }{
1319 \end{trivlist}
1320 }
1321
1322 \fi
1323 (/classXimera)
Feedback environments take an optional parameter (which describes when the feedback
is to be provided)
```

```
1325 \end{code} {\tt (Qfeedbackcode) {\tt (Qfeedbackattempt)}}
1326 \def\@feedbackattempt{\@feedbackcode[attempt]}
1327 \def\@feedbackcode[#1]{\stepcounter{identification}%

1333 (/htXimera)
```

#### 2.12.3Ungraded activities

ungraded

The ungraded environment is used to record that certain parts of activities should not be worth points. For example, if you want to use a multiple Choice as a survey question, you can place it inside an ungraded environment. On the LATEX side, the ungraded environment does nothing.

```
1334 (*classXimera)
1335 \newenvironment{ungraded}{}{}
1336 (/classXimera)
But on the html side, ungraded wraps the activities in a div in order to assign some
weight to them for grading.
1337 (*htXimera)

#### 2.13 Support for the web

```
2.13.1
                             MathJax support
When using mathjax, dump all the \newcommands to a .jax file.
           First, create the .jax file.
1344 (*classXimera)
1345 \ifdefined\HCode
1346 \else
1347
                             \newwrite\myfile
1348
                             \immediate\openout\myfile=\jobname.jax
1349 \fi
1350 (/classXimera)
From only.dtx we must also create prompt on the MathJax side.
1351 (*classXimera)
1352 \fined\HCode
1353
                   \else
1354
                              \immediate\write\myfile{\unexpanded{\newenvironment}{prompt}{}}}
1355 \fi
1356 (/classXimera)
Redefine newcommand appropriately.
1357 (*classXimera)
1358 \ifdefined\HCode
1359 \else
1360 \let\@oldargdef\@argdef
1361 \long\def\@argdef#1[#2]#3{%
1362 \label{limediate/write/myfile{\unexpanded{newcommand}} {\unexpanded{#1}} [\unexpanded{#2}] {\unexpanded{mexpanded{#2}} {\unexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpanded{mexpand
1363 \@oldargdef#1[#2]{#3}%

#### 2.14.2 The End

```
It seems that some of the files need to conclude with something or another.
```

```
1468 (*htXimera)
1469 \Hinput{ximera}
1470 (/htXimera)
1471 (*htXourse)
1472 \Hinput{xourse}
1473 (/htXourse)
1474 (*cfgXimera)
1475 \begin{document}
1476 \EndPreamble
1477 (/cfgXimera)
```

# 3 xourse.cls

```
1478 (*classXourse)
```

The default behavior of the class is to provide a table of contents listing all activities in the course. This option will supress this table of contents.

```
1479 \newif\ifnotoc
1480 \notocfalse
1481 \DeclareOption{notoc}{\notoctrue}
```

nonewpage

The default behavior of the class is to start each activity on a new page. This option will start activities without making a new page.

```
1482 \newif\ifnonewpage
1483 \nonewpagefalse
1484 \DeclareOption{nonewpage}{\nonewpagetrue}

1485 \DeclareOption*{\PassOptionsToClass{\CurrentOption}{ximera}}

1486 \ProcessOptions\relax

1487 \LoadClass{ximera}

1488 % \begin{macrocode}

1489 \( /classXourse \)
```

# 3.1 Activities

The core of the xourse system. It works by redefining the document environment, thus making the \begin and \end{document} of the subfile 'transparent' to the inclusion. The redefinition of \documentclass is analogous, just having a required and an optional arguments which mean nothing to \subfile.

```
1490 (*classXourse)
1491 \newcommand{\skip@preamble}{%
1492 \let\document\relax\let\enddocument\relax%
1493 \newenvironment{document}{\let\input\otherinput}{}%
1494 \renewcommand{\documentclass}[2] [subfiles]{}}
```

Note that the new command \subfile calls for \skip@preamble within a group. The changes to document and \documentclass are undone after the inclusion of the subfile.

Numbering starts a page too soon without this:

```
1495 \verb|\let+\otherinput+\input|
```

Store usual \maketitle as \othermaketitle

1496 \let\othermaketitle\maketitle

\maketitle In a xourse file, \maketitle is redefined to give course packet title page and toc.

```
1497 \renewcommand{\maketitle}{ % 1498 \pagestyle{empty} 1499 \begin{center} 1500 ~\\ %puts space at top of page to move title down. 1501 \vskip .25\textheight
```

```
1503 \vskip 1em
1504 \bfseries{\Huge \@title} \\
1505 \hrulefill\\
1506 \vskip 3em
1507 {\Large \@author}
1508 \vskip 2em
1509 {\large \@date}
1510 \end{center}
1511 \clearpage
When notoc option is used, we do not include a table of contents. Otherwise we include
a table of contents in every course packet.
1512 \ifnotoc
1513 \else
1514
      \tableofcontents\clearpage
1515
      \clearpage
1516 \fi
Switch to main pagestyle, just like a document with document class ximera.
1517 \pagestyle{main}
Renew maketitle to usual definition.
1518 \let\maketitle\othermaketitle
And we finish with our redefinition of \maketitle.
1520 \relax
1521 (/classXourse)
```

#### 3.1.1 Regular activities

 $1543 \langle *classXourse \rangle$  $1544 \setminus ifxake$ 

1502 \hrulefill\\

\activity

Documents included with \activity will be included in the body of the xourse document. Any \input commands within included ximera documents will be ignored. Any \usepackage commands within included ximera documents will cause an error. Overlapping \newcommand definitions within multiple ximera documents included simultaneously will cause an error. The \activity command inputs the file name provided without \documentclass, without \begin{document}/\end{document} and without any inputs in the preamble of the included file.

```
1522 (*classXourse)

                       Grading by points
                The graded environment does nothing in latex, but in html, it wraps the activities in a
       graded
                div in order to assign some weight to them for grading.
                1605 (*classXourse)
